CALIFORNIA STATISTICAL ABSTRACT

California proudly presents the annual measure of its growth in this, the fourth, Statistical Abstract. The story told in the charts, graphs, and tables in this volume is a story of growth unmatched anywhere in the United States. It tells of this state's growth in population, personal income, business and industry—in short, all the economic elements of the California success story. These figures tell still another story to those who read them carefully. That is the story of the growth in personal opportunity which is the goal for which we strive now and in the future.

ACKNOWLEDGMENTS

With publication of the fourth edition of the California Statistical Abstract, the Economic Development Agency again emphasizes this compilation is possible only because of the indispensable contributions of the many departments of the State, of the several agencies of the United States government, of the California State Chamber of Commerce, and of the Association of Independent California Colleges and Universities. Their combined statistics again make this publication a reality. We gratefully thank all who have contributed so much.

We emphasize our special appreciation for the editorial advice and assistance of Maurice I. Gershenson, Department of Industrial Relations, George S. Roche, Department of Employment, and Ronald S. Coppin, Department of Motor Vehicles. Appointed by the Interdepartmental Research Coordinating Committee as the statistical abstract editorial committee, their experienced counsel has been most generously and willingly given.

We also take this opportunity to give special thanks to W. Ralph Currie, Department of Finance, who through the years has done so much to encourage publication of this book and who, because of so many other duties and responsibilties, could not again be a member of the statistical abstract editorial committee. We are indeed fortunate, however, to continue to have available his helpful advice and recommendations.

In making tabular presentations, again this year we were able to have the helpful guidance of Miss Ruth H. Krause and Mrs. Noël Barber, Department of Industrial Relations.

A special word of commendation likewise is due the State Printing Division, especially Assistant State Printer, Ralph Titus, and all his staff who have devoted so much of their energy and time to assure printing a quality publication.

Many other individuals who also deserve a word of commendation, but regrettably must be nameless, have made it possible for the Economic Development Agency to present these basic important statistics of California agriculture, commerce, education, finance, geography, industry, labor, natural resources, population, transportation, world trade and other important aspects of the development of this State.

Economic Development Agency
Lewis M. Holland, *Commissioner*

October 15, 1963

INTRODUCTION

THE STATE

California extends more than a thousand miles between the 32nd and the 42nd parallels of north latitude on the Pacific Coast of the United States. The State, first visited by Europeans in 1542, has been administered under nine flags. After a short period as an independent republic, it was admitted to the Union on September 9, 1850, as the 31st state. California is organized into 58 counties, and as of June 30, 1963 there were 382 incorporated cities; nearly 1,700 school districts of all types; and more than 3,400 special districts organized for other purposes.

Gross area of California is 101,563,520 acres, of which 100,206,720 is land area. Nearly half the total land is owned by the U.S. government, chiefly national forests and wild lands. The 1959 U.S. Census of Agriculture indicates 36.8 percent of the total land area is in farms. California's varied topography is indicated by mountain peaks of more than 14,000 feet above sea level and Death Valley at 282 feet below sea level. A unique feature of the topography is the large Central Valley of the Sacramento and San Joaquin rivers which contains much of the State's rich agricultural land. California's climate is temperate, but includes variations ranging from subtropical to frigid. Annual rainfall varies from more than 100 inches a year on the northwest coast to less than two inches in the southeast desert. The most populous areas experience annual rainfall of from 10-25 inches.

POPULATION

The State has doubled its population every twenty years since 1860. While the implications of California's population growth during the most recent period might seem staggering—the number of State residents has increased at a rate of 1,700 per day—rapid growth is not new to California. In the last ten years the civilian population increased an average of approximately 567,000 per year.

California's population as of July 1, 1963 was 17,675,000. This represented a gain of 631,000 or 3.7 percent during the twelve preceding months, a rate of increase more than twice that of the United States whose population increased 1.5 percent. As usual, the flow of migrants was responsible for the greater part of the increase. While the natural increase was 237,000 during the preceding fiscal year, a net total of about 368,000 civilian residents moved to California and these accounted for approximately 60 percent of the year's civilian population gain. Actually, net migration into California has exceeded 300,000 annually every year since 1955. The number of persons moving to the State has exceeded the number departing by more than one million since 1960.

California is one of the most urbanized of all states. At the time of the Census of 1960, only the District of Columbia whose population was 100 percent urban and New Jersey with 88.6 percent exceeded Rhode Island and California who were virtually tied at 86.4 percent urban. In contrast, 51 percent of those in other states lived in such areas.

In 1963, approximately 60 percent of the State's population lives in the ten southernmost counties. One of these, Los Angeles, with 6,593,500 residents is the most populous county in the United States. California's second most populous county, San Diego County, is also among the southernmost ten, as is the fastest growing county in the State—Orange. The nine San Francisco Bay Area counties comprise two metropolitan areas (San Francisco- Oakland and San Jose) and two counties (Napa and Sonoma) which were non-metropolitan at the time of the Census. This complex contains 23 percent of the State's population.

The State has a smaller proportion of residents 65 years or older than the United States. The age distribution of California's population is generally similar to the Nation as a whole, although a somewhat larger proportion of its population is concentrated in the working age years, 20 to 65. A comparison of the age distribution of California and the United States population is given in the following table:

AGE DISTRIBUTION OF THE POPULATION: CALIFORNIA AND THE UNITED STATES, 1960

(In percent)

	California	*United States*
Total	100.0	100.0
Under 20 years	37.2	38.5
20-39 years	27.5	25.7
40-64 years	26.5	26.6
65 years and over	8.8	9.2

Official projections of population at five-year intervals through 1980 are:

TOTAL POPULATION OF CALIFORNIA, JULY 1, 1965-80

Year	*Population*
1965	18,835,000
1970	21,734,000
1975	24,830,000
1980	28,137,000

Source: Department of Finance, Special Report, *Provisional Projections of California Areas and Counties to 1980,* February 15, 1963.

PERSONAL INCOME

Personal income of California residents reached a record total of $49.2 billion in 1962. This represented nearly double the $25.1 billion reported for 1952, just ten years earlier, and a ten fold increase within a quarter century. Per capita income of $2,898 was 22.5 percent above the national average.

Two-thirds of California's personal income is received in the form of wages and salaries. Receipts from this source amounted to $33.2 billion in 1962. Property income amounted to $6.8 billion, of which approximately half was received as interest, one-fourth comprised dividend income and the remainder represented rental income, including imputed rent on owner-occupied dwellings. A comparison of income components in the State and the Nation is shown in the following table:

COMPONENTS OF PERSONAL INCOME, 1962

(In millions)

	California		*United States*	
	Amount	*% of Total*	*Amount*	*% of Total*
Total	$49,187	100.0	$439,661	100.0
Wages and salaries	33,186	67.5	294,695	67.0
Other labor income	1,206	2.4	12,060	2.7

Farm	968	2.0	13,297	3.0
Non-farm	4,367	8.9	36,511	8.3
Property income	6,784	13.8	58,569	13.3
Transfer payments	3,971	8.1	34,729	7.9
Less: Contributions for social insurance	—1,296	—2.6	—10,195	—2.3

Sources: *Survey of Current Business, August, 1963; U.S. Department of Commerce, Office of Business Economics.*

California accounted for 11.3 percent of the aggregate personal income allocable to states in 1962. This compares with 9.4 percent of the total ten years earlier. Manufacturing is the largest source of income with one-fourth of the total derived from participation in current production.[a] Trade is second in importance, followed by service industries and government. Relative contributions by each of the major economic sectors are shown below:

RELATIVE SOURCES OF CIVILIAN INCOME FROM PARTICIPATION IN CURRENT PRODUCTION, CALIFORNIA AND UNITED STATES, 1962

	Percent of total	
	California	*U.S.*

LABOR FORCE, EMPLOYMENT AND EARNINGS

California's civilian labor force averaged 6,641,000 during 1962, an increase of 162,000 (or 2.5%) from 1961. During the past ten years the rate of growth of California's labor force has been more than twice that of the nation—35.5 percent compared with 14.1 percent.

Civilian employment in the State increased by 219,000 between 1961 and 1962, to a new high of 6,252,000. Employment increased more rapidly than the labor force, and both unemployment and the unemployment rate declined. An average of 389,000 California workers were unemployed during 1962, which was about 5.9 percent of the labor force, compared with 6.9 percent during 1961.

ESTIMATED CIVILIAN EMPLOYMENT IN CALIFORNIA BY INDUSTRY, 1961-62

(In thousands)

[a] Detail does not add to total because of rounding.

Source: *Departments of Industrial Relations and Employment.*

California nonagricultural employment established a new record of 5,209,400 wage and salary workers in 1962. On the average, 214,200 more persons were working in nonfarm industries in 1962 than in 1961, a job growth of 4.3 percent and the largest year-to-year increase since 1959.

One-third, or 69,500, of the new jobs created were in manufacturing. Within manufacturing, the main growth was concentrated in two industries—electronics and missiles.

Annual employment in five industry divisions—manufacturing, trade, government, services, and finance-insurance-real estate—reached new highs in 1962.

About 90 percent of all nonfarm workers in the State in 1962 were employed in the ten major metropolitan areas—Los Angeles-Long Beach, San Francisco-Oakland, San Diego, San Jose, Sacramento, San Bernardino-Riverside-Ontario, Bakersfield, Fresno, Stockton and Santa Barbara.

Average weekly earnings of manufacturing production workers in California increased to an all-time high of $112.44 in 1962. Hourly earnings averaged $2.79, also a new record. The factory workweek averaged 40.3 hours, the longest since 1956.

Earnings of manufacturing production workers in California continued above the national level. The California averages of $2.79 per hour and $112.44 per week in 1962 compared with $2.39 per hour and $96.56 per week, respectively, in the nation. The factory workweek in California averaged about the same as in the United States.

MANUFACTURING

California is the nation's second-ranked state in value added by manufacturing. In 1961, California manufacturers produced $14.3 billion in added value, approximately 8.7 percent of the national total according to the *Annual Survey of Manufactures.*

---

[a] Wages and salaries, other labor income and proprietors' income.

Approximately $2.6 billion in value was added by manufacturers of transportation equipment. Second was food and kindred products with $2.3 billion, while electrical machinery was third with $1.5 billion.

California was first among the ten leading U.S. industrial states in manufacture of food and kindred products ($2.3 billion), in lumber and wood products ($398.1 million), and miscellaneous manufactures ($1.0 billion). This state was second in furniture and fixtures ($261.6 million), petroleum products ($360.3 million), stone, clay and glass products ($593.5 million) and transportation equipment ($2.6 billion).

The Los Angeles-Long Beach Metropolitan Area accounted for approximately 58.2 percent ($8.3 billion) of value added by California manufacturers and the San Francisco-Oakland Metropolitan Area produced 16.7 percent ($2.4 billion). The two areas, produced three-quarters of the State total. Nationally, only the New York and Chicago Metropolitan Areas exceeded Los Angeles-Long Beach Metropolitan Area in value added by manufacturing.

In 1961 expenditures for plant and equipment came to $737.8 million, about 7.7 percent of the U.S. total. Industries making the largest investments were food and kindred products ($104.3 million), electrical machinery ($85.9 million), and transportation equipment ($71.5 million). During the 1958-61 interval a total of nearly $3.0 billion was spent on new plant and equipment in California.

CORPORATE INCOME

Net income of more than $3.7 billion was reported by 91,548 active banks and corporations operating in the State during 1961. This represents 8.5 percent of the compiled net income of all corporations in the Nation. Manufacturing industries, with earnings of $1.2 billion, accounted for one-third of the total. The finance, insurance and real estate group, with $867 million was in second place, followed by public utilities ($780 million), trade ($460 million) and mining and oil production ($189 million).

A measure of California's economic growth is provided in the data showing an increase of 172.9 percent in the number of active corporations since 1950, compared with 81.2 percent nationwide. Aggregate net income increased 61.4 percent, against a 2.1 percent rise for all corporations filing Federal income tax returns.

The number of California companies in all income brackets is growing steadily. During 1950-61 there was an increase of 152.2 percent in the number of those with incomes of less than $10,000. Companies earning between $10,000 and $99,999 increased by 175.1 percent while the number of those with reported income of $1 million and more increased by 43.1 percent.

FOREIGN TRADE

Exports moving through customs districts in the State do not necessarily originate in California or, in the case of imports, are not necessarily bound just for California destinations. A study made by the Department of Commerce of the year 1960, however, indicated the State is a major producer of products for exports. During 1960, California ranked third among the states in value of manufactured goods which were exported. The leading products were transportation equipment, food products, and chemicals and allied products.

During 1962 more than $1.3 billion exports for world trade moved through California customs districts, while in excess of $1.4 billion imports entered the United States via California. During 1962 the value of exports dispatched through customs districts in the State was about $89 million or six percent below the 1961 level, while the value of U.S. merchandise exported increased by about 3 percent.

Imports increased more sharply into California than the U.S. between 1961 and 1962. An increase of about $222 million into the State represented better than an 18 percent gain. Nationally, imports increased by about 11.4 percent.

AGRICULTURE

According to the 1959 U.S. Census of Agriculture there were more than 99,000 farms in California and about 37 million acres of farm land. The average farm consists of 372 acres. Between 1954 and 1959 the number of farms declined by 19 percent, the amount of farm land declined by two percent, and the average size of farms increased by 21 percent.

California continues to be the nation's leading agricultural producer both in value and diversity of output.

Cash receipts from marketing received by California farmers during 1962 totaled $3.3 billion, approximately $100 million more than in 1961. Sales of all crops were an estimated $2.0 billion and accounted for 60 percent of total receipts. Livestock products earned $1.3 billion or 40 percent. Realized net farm income, including government payments and value of products consumed on the farm totaled $865 million.

FORESTRY

Forestry is one of the most important California industries and represents a significant proportion of national forestry activities. The State contains 42.5 million acres of forest land, ranking first in the United States. More than 17 million acres are commercial timber. California is the second ranking state in volume of standing timber.

Approximately 16 percent of United States lumber production and substantial quantities of other wood products are manufactured in California. The State ranks second in timber cutting, second in lumber production and third in plywood manufacture.

MINERALS

Mineral wealth provided the historical impetus for California's first great wave of in-migration. Although gold mining has lapsed into relative unimportance, the State continues to be a leading producer of many important minerals. Estimated value of California's 1962 total mineral production was nearly $1.5 billion. Petroleum, "black gold", accounted for approximately 51 percent of the total, while natural gas and natural gas liquids contributed 16 percent. The remaining 33 percent included a wide variety of minerals, with cement, sand and gravel, stone, and borates the most important in dollar value.

WATER RESOURCES

California has ample water to meet the State's present and forseeable needs. However, 70 percent of the available water supply is in the northern one-third of the State, while about 77 percent of the demand for water is in the southern two-thirds. To assure adequate distribution, the State has adopted the "California Water Plan".

The Water Plan is the culmination of studies made by the State Department of Water Resources and its predecessor agency which have been carried on continuously since 1947. In addition to providing plans for redistributing the water supply, the "California Water Plan" was designed as a multi-purpose program which will solve flood and water quality control problems. Also, it is a master state-wide plan to insure cooperation and coordination of all agencies—local, State and U.S. government—in constructing the physical works required for control, protection, conservation and distribution of California's water resources.

In 1960, California voters approved sale by the State of $1.75 billion general obligation water bonds to assist in constructing the California Water Project portion of the "California Water Plan". Plans call for sale of these bonds over a long period of years, beginning in 1963. These bonds will subsequently be repaid from revenues obtained from the sale of project water, power and other services. Construction includes 16 reservoirs, 662 miles of aqueducts and storage facilities such as Oroville Dam on the Feather River. In 1962, a $121 million contract for initiation of major construction at Oroville Dam was awarded by the State. In 1963, about $80 million will be spent in furtherance of the total construction program of the California Water Project. When completed, the project will bring surplus water from Northern California to as far south as San Diego.

SECTION A

AREA, GEOGRAPHY AND CLIMATE

This section presents summary descriptive data measuring the land and water areas of the State and describing the distribution of temperature and precipitation. The basic sources of these data are the Federal agencies responsible for surveying and mapping the United States and for recording its weather. Information on Federal and State parks and monuments is from inventories reported by the cognizant agencies.

Data given on Table A-12 on frost-free periods refer to the portion of each year during which the daily minimum temperature remains above 28 degrees Fahrenheit.

The first plate is a map which shows lines of equal average annual precipitation, generalizing records and estimates that cover the past 50 years for a large number of weather stations throughout the State.

A second plate consists of a graph showing the greatest rainfalls which have been recorded in California. A map insert on this graph gives the location of the precipitation stations reporting these rainfalls. Each point plotted on the graph indicates the amount of rain recorded and the length of time in which it occurred.

TABLE A-1

AREA OF CALIFORNIA

Type	Square miles	Acres
Gross area of State	158,693	101,563,520
Land area [a]	156,573	100,206,720
Inland water [b]	2,120	1,356,800
Coastal water [c]	69	44,160

[a] Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.

[b] Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the ocean or bays.

[c] Water other than inland water. Much of the water adjacent to the State and falling under its jurisdiction does not belong to any particular county. The State area as shown above includes only the water which could be assigned to the counties and subdivisions of the counties. The definition adopted by the Bureau of the Census, characterizes this water as "inland water."

SECTION B.

WATER

This section presents summary information describing the uses to which land is put in California, the amount which receives water service, and the distribution of the available water supply of the State. Whenever possible, the information is given by hydrographic areas which are outlined on the map immediately preceding this section.

The interested reader who wishes to secure detailed information on these subjects is referred to State Water Resources Board, Bulletin No. 1, *Water Resources of California,* 1951, and to State Water Resources Board, Bulletin No. 2, *Water Utilization and Requirements of California,* June 1955. These two publications constitute a compilation and analysis of extensive stream flow data that measure the California water supply, and information about the water requirements that have developed and that can be expected to develop.

Records of stream flow are of varying duration and recording stations have been relocated from time to time in some instances. For these reasons, reference to a more detailed source of information is advisable in the event that specific analysis is contemplated.

TABLE B-1

TOTAL ACREAGE AND ACREAGE RECEIVING WATER SERVICE,[a] BY HYDROGRAPHIC AREA, CALIFORNIA

(In thousands)

Hydrographic area	Total acreage	Acreage receiving water service		
		Gross irrigated [b, c]	Urban and suburban [d]	Miscellaneous [d, e]
Total	100,690 [f]	8,516	1,054	182
North Coastal	12,500	232	18	20
San Francisco Bay	2,530	133	225	50
Central Coastal	7,220	357	49	12
South Coastal	7,000	555	547	1
Central Valley	38,050	6,294	191	85
Sacramento River Basin	*17,110*	*1,449*	*101*	--
Tulare Lake Basin	*9,550*	*2,892*	*50*	--
San Joaquin River Basin	*11,390*	*1,953*	*40*	--
Unclassified acreage not subdivided	--	--	--	*85*
Lahontan	20,970	235	10	4
Colorado Desert	12,420	710	14	10

[a] Based on land and water use surveys conducted by the Department of Water Resources.

[b] Includes farm lots and minor included acreages not receiving water service, such as roads, railroads, rights of way and other nonagricultural parcels of land.

[c] Estimates and surveys indicative of 1960 level of irrigation development.

[d] Estimates and surveys indicative of 1950 level of urban, suburban and miscellaneous development.

[e] Acreages, other than irrigated and urban, which received water service, such as the developed portions of recreational areas, military reservations, wild fowl refuges, and artificial water surfaces on the floor of the Central Valley. These last consume water by evaporation.

[f] Includes all water surfaces except Humboldt, San Francisco, and San Diego Bays, and the California portion of Lake Tahoe.

TABLE B-6

LOCATION, DRAINAGE AREA, AND AVERAGE RUNOFF OF REPRESENTATIVE CALIFORNIA STREAMS

Stream	Gaging station	Hydrographic area	Drainage area (in square miles)	Mean annual runoff (in 1,000 acre-feet)
Klamath River	at Somesbar	North Coastal	8,480	5,690[a]
Trinity River	near Hoopa	North Coastal	2,848	3,988[a]
Eel River	at Scotia	North Coastal	3,113	5,169[a]
Russian River	at Guerneville	North Coastal	1,342	1,293[a]
Napa River	near Napa	San Francisco Bay	219	129[b]
Alameda Creek	near Niles	San Francisco Bay	633	119[b]
Pajaro River	near Chittenden	Central Coastal	1,186	202[b]
Salinas River	above San Lucas dam site	Central Coastal	2,880	520[b]
Huasna River	near Santa Maria	Central Coastal	119	13[c]
Santa Ynez River	near Lompoc	Central Coastal	790	158[b]
Sespe Creek	near Fillmore	Central Coastal	253	65[c]
San Gabriel River	near Azusa	South Coastal	211	120[d]
Santa Ana River	near Mentone	South Coastal	202[e]	65[c]
Santa Margarita River	at Ysidora	South Coastal	740	37[b]
San Luis Rey River	at Oceanside	South Coastal	557	62[b]
San Diego River	near Santee	South Coastal	380	52[b]
Pit River[f]	near Montgomery Creek	Central Valley	5,235	2,918[c]
Sacramento River	near Red Bluff	Central Valley	9,300	7,954[c]
Feather River	near Oroville	Central Valley	3,615	4,350[c]
Yuba River	at Smartville	Central Valley	1,189	2,273[c]
American River	at Fair Oaks	Central Valley	1,889	2,636[c]
Stony Creek	at Black Butte Damsite near Orland	Central Valley	741	459[a]
Cache Creek	near Capay	Central Valley	1,052	443[g]
Putah Creek	near Winters	Central Valley	577	345[a]
Cosumnes River	at Michigan Bar	Central Valley	537	359[c]
Mokelumne River	near Mokelumne Hill	Central Valley	538	722[c]
Stanislaus River	Below Melones Power house	Central Valley	898	1,111[c]
Tuolumne River	above La Grange Dam	Central Valley	1,534	1,803[c]
Merced River	at Exchequer	Central Valley	1,029	943[c]
San Joaquin River	below Friant Dam	Central Valley	1,675	1,704[c]
Kings River[h]	below Pine Flat Dam	Central Valley	1,662	1,607[c]
Kaweah River	near Three Rivers	Central Valley	520	394[c]
Tule River	at Worth Bridge, near Porterville	Central Valley	395	140[b]
Kern River	near Bakersfield	Central Valley	2,420	688[c]
Truckee River	at Farad	Lahontan	932	581[b]
Owens River	below Long Valley	Lahontan	437	155[c]
Colorado River	at Imperial Dam	Colorado Desert	184,600	12,850[d]

---

[a] 50-year mean, 1910-11 to 1959-60.
[b] 52-year mean, 1895-96 to 1946-47.
[c] 50-year mean, 1907-08 to 1956-57.
[d] 53-year mean, 1904-05 to 1956-57.
[e] Includes area tributary to Baldwin Lake at head of Bear Valley.
[f] Includes area and runoff of Squaw Creek above Shasta Lake.
[g] 40-year mean, 1905-06 to 1954-55.
[h] Includes area and runoff of Mill Creek.

Explanatory note:

This list of major dams and reservoirs within California is only a listing of those projects which are outstanding either due to the height of the dam or the storage capacity of the reservoir. It includes those dams or reservoirs over 190 feet in height or at least 100,000 acre-feet capacity. There are more than 900 dams within the jurisdiction of the State. State jurisdiction is exercised over dams within the State of California which are 25 feet or more high, storing more than 15 acre-feet, or are more than six feet high, storing 50 acre-feet or more. In addition, there are nearly 70 dams owned and operated by agencies of the United States that are exempt from State jurisdiction.

[a] List of abbreviations (Builder):
U.S.B.R.—United States Bureau of Reclamation
M.C.F.C.&W.C.D.—Monterey County Flood Control & Water Conservation District
P.G.&E.—Pacific Gas and Electric Company
S.C.V.W.C.D.—Santa Clara Valley Water Conservation District
L.A.C.F.C.D.—Los Angeles County Flood Control District
M.W.D.—Metropolitan Water District of Southern California
I. D. in name of builder refers to Irrigation District
E.B.M.U.D.—East Bay Municipal Utility District

[b] List of abbreviations (Purpose of dam):
Mult-purp—Multi-purpose
Stor—Storage
Div—Diversion
Reg—Regulation
Fl. cont—Flood control

[c] List of abbreviations (Use of water):
Irr—Irrigation
Pwr—Power
Rec—Recreation
Mun—Municipal
Dom—Domestic
Ind—Industrial

	Lucerne Valley	103	—5[d]
	Borrego Valley	72	—2[d]

[a] Plus (+) denotes a rise in water level; minus (—), a decline in water level.
[b] Except as noted in footnote [e] below.
[c] (—) indicates negligible change (less than one foot).
[d] Spring 1959 to Spring 1963.
[e] Water Conservation District.
[f] Water Storage District.

TABLE B-9

ESTIMATED ANNUAL REQUIREMENTS FOR WATER,[a] BY HYDROGRAPHIC AREA, CALIFORNIA

(In thousand acre-feet)

Hydrographic area	Type of water service: Irrigation and farm-lot	Urban and suburban	Miscellaneous
Total	22,580	1,654	224
North Coastal	508	21	5
San Francisco Bay	248[b]	388	36
Central Coastal	647	47	15
South Coastal	917[c]	885	2
Central Valley	15,608	277	104
Sacramento River Basin	n.a.	*104*	*70*
Tulare Lake Basin	n.a.	*109*	*3*
San Joaquin River Basin (including Delta)	n.a.	*64*	*31*
Lahontan	709	12	14
Colorado Desert	3,943	24	48

[a] Water requirements of acreages receiving water service, as indicated in Table B-1. Dates of surveys and estimates are those given in footnotes [c] and [d] of that table.
[b] Farm-lot service included with "Miscellaneous."
[c] Farm-lot service included with "Urban and suburban."

SECTION C.

AGRICULTURE

Data presented in this section, with the exception of United States Census data, are official estimates of the United States and California Departments of Agriculture. These estimates are available currently in reports issued by the Bureau of Agricultural Statistics, which also contain more detailed statistics. Data for many agricultural commodities are available for varying numbers of years preceding those shown in the tables. Data for 1962 are preliminary estimates.

Minor crops for which estimates are not prepared are not included in the "all field crops," "all fruit and nut crops," "all bushberry crops" and "all vegetable crops" categories in the tables. Certain information for some items does not appear in the tables because estimates are not applicable or were not made for the specific crop. For example, cottonseed is harvested from the same acreage as cotton lint, therefore acreage estimates are not published for cottonseed. Another example is corn for forage, for which separate production and value data are not estimated.

Years designated. The years designated for crops are "crop years" not calendar years. Planting or blooming may have started in the preceding year and marketing may have extended into the following year. Price and value data for livestock and poultry products, except wool, pertain to marketings in the year specified. Production data for livestock and poultry products are for calendar years.

Prices. Estimates of prices received by farmers generally represent composite averages of all grades, classes and methods of sale for the State as a whole. Prices for vegetables for fresh market represent the average paid for the packed products loaded at f.o.b. position. Prices for fruit and nuts are on the basis of naked fruit at growers' first delivery point.

Production of no value. Occasionally a portion of the production of a crop has no value. When this occurs, that portion without value is excluded from computations of average unit value and total value.

TABLE C-1

NUMBER OF FARMS IN CALIFORNIA BY SIZE GROUP, SELECTED YEARS, 1920-59

Size group	1920	1930	1940	1950[a]	1954	1959[a]
Total	117,670	135,676	132,658	137,168	123,075	99,274
Under 10 acres	16,697	28,892	31,546	37,402	34,138	24,120
10-49 acres	49,093	56,985	54,467	51,760	44,342	34,575
10-29 acres	n.a	n.a.	37,826	35,867	30,382	23,364
30-49 acres	n.a	n.a.	16,641	15,893	13,960	11,211
50-99 acres	15,034	16,378	15,200	15,257	13,705	11,655
50-69 acres	n.a.	n.a.	7,138	7,303	6,498	5,628
70-99 acres	n.a.	n.a.	8,062	7,954	7,207	6,027
100-259 acres	18,537	16,537	15,131	15,153	13,971	12,603
100-139 acres	n.a.	n.a.	5,334	5,720	5,132	4,619
140-179 acres	n.a.	n.a.	5,335	4,877	4,395	3,906

---

[a] Cleaned basis.

[b] Yield in pounds net lint; production in 500 pounds gross weight bales; price on cwt. basis.

[c] Produced on the same acreage as estimated for cotton lint.

[d] Estimates discontinued.

[e] Pounds.

[f] Price on a hundredweight basis.

[g] Relates to year of harvest. It also includes some acreage carried over and harvested the following spring. Prices include "support" payments but do not include Government payments under the Sugar Act.

bu. Bushels
cwt. Hundredweight
lbs. Pounds

Bureau of Agricultural Statistics

SECTION D.

FISHING

This section presents statistics of quantity, value, species, and disposition of fish caught for commercial purposes, and recreational use of California wild life.

Information relative to fisheries and the recreational use of wild life is available from the Department of Fish and Game. Data are published regularly in the *Biennial Report* of the Department of Fish and Game; in the annual *Statistical Report of Fresh, Canned, Cured and Manufactured Fishery Products;* annually in *The California Marine Fish Catch;* in the *Monthly Statewide Report of Receipts and Case Pack, Tuna and Other Species;* monthly in the *Sardine Report* (issued only during sardine canning season); and in the monthly *Report of The California Party Boat Fleet* (sportcatch).

TABLE D-1

COMMERCIAL FISHERMEN AND VESSELS IN THE CALIFORNIA FLEET, 1950-51 TO 1961-62

Year	Number of commercial fishermen	Number of vessels in commercial fishing fleet[a]	Number of party boats
1950-51	14,600	6,103	972
1951-52	13,193	5,837	952

SECTION E.

FORESTRY

Forestry is one of the most important enterprises in California and represents a significant proportion of such activities in the nation. The State contains 42.5 million acres of forest land, ranking first in the United States. More than 17 million acres are commercial timber. California has the second largest U.S. volume of standing timber.

About 16% of United States lumber production and substantial quantities of other wood products are manufactured in California. The State ranks second in timber cutting, second in lumber production, and third in plywood manufacture. There are approximately 1500 timber operators, 600 sawmills, 26 plywood producers, ten woodpulp mills, four particle board plants, and many secondary wood using industries, e.g., furniture and paper, in California. See *Table W-3* under manufacturing for statistics on employees and product value.

These industries are dependent upon a renewable resources—growing crops of trees—recognized as good business. Forests are vital to California also for watershed protection, recreation, and fish and wildlife.

More detailed data than that contained in the following tables are contained in *Forest Statistics for California* (Berkeley, 1954), *California's Timber Industries: Some Facts and Figures* (Berkeley, 1959), *A Century of Lumber Production in California and Nevada* (Berkeley, 1953) published by Pacific Southwest Forest and Range Experiment Station of U. S. Forest Service. See also *Production of California Timber Operators in 1961* (Sacramento, 1962) of California Division of Forestry and various U. S. Bureau of Census reports cited in the tables. Information concerning potential of woodpulp industry and waste disposal is found in *Waste Treatment and Disposal Aspects to Development of California's Pulp and Paper Industries* (Sacramento, 1957) published by State Water Quality Control Board.

SECTION F.

MINERALS

This section presents summary statistics of the quantity and value of mineral production in California, compiled by the Division of Mines and Geology and the Division of Oil and Gas, California Department of Conservation. More detailed figures are available from these agencies.

The monthly publication, *Mineral Information Service,* provides information on geology and mineral resources of California, the usefulness of minerals and rocks, and mineral production statistics.

In addition to this monthly release, the Division of Mines also issues the Report of the State Geologist and a number of other publications. The most recent edition of *Mineral Commodities of California* was released in 1957 as BULLETIN 176. It gives information on the geologic occurrence, economic development, and utilization of the State's mineral resources.

Detailed statistics on petroleum and natural gas production are published by the Division of Oil and Gas in the semiannual *Summary of Operations, California Oil Fields,* and the monthly *Oil and Gas Production Report,* both free.

Statistics of mineral operations in California will also be found in the reports of the Census of Mineral Industries published by United States Bureau of the Census. Latest census was conducted for 1954.

SECTION G.

POPULATION

The tables in this Section summarize available data on the population of the State of California, its counties and cities. Comparisons of California's population with the totals for the Pacific Division and the nation are also shown.

All figures on the population of California through April 1, 1950 and those for April 1, 1960 are from publications of the United States Bureau of the Census, and represent decennial census counts or estimates prepared by that agency. The estimates for the years 1950 to 1963 were prepared by the Department of Finance and are based on the analysis of components of population change summarized in Table F-4. Data used in the preparation of these estimates have been obtained from the Bureau of Records and Statistics, Department of Public Health; the Bureau of Education Research, Department of Education; the State Selective Service System, the United States Department of Defense; and the United States Department of Commerce, Bureau of the Census.

The Department of Finance publishes annual reports on the State's population, presenting additional material which includes current estimates of the State and County populations. A series of quarterly reports is published listing current estimates prepared by the department at the request of various California cities.

TABLE G-4

ESTIMATED COMPONENTS OF CHANGE IN CALIFORNIA'S CIVILIAN POPULATION, 1940 TO 1963

Year (July 1)	Civilian population	Net change	Net migration	Natural increase	Loss to military[a]
1940	6,899,000	--	--	--	--
1941	7,049,000	150,000	195,000	39,000	—84,000
1942	7,297,000	248,000	324,000	57,000	—133,000
1943	7,570,000	273,000	521,000	86,000	—334,000
1944	8,083,000	513,000	582,000	88,000	—157,000
1945	8,523,000	440,000	365,000	97,000	—22,000
1946	9,298,000	775,000	99,000	93,000	+583,000
1947	9,672,000	374,000	123,000	160,000	+91,000
1948	9,895,000	223,000	82,000	145,000	—4,000
1949	10,161,000	266,000	131,000	147,000	—12,000
1950	10,472,000	311,000	155,000	146,000	+10,000
1951	10,754,000	282,000	268,000	149,000	—135,000
1952	11,194,000	440,000	284,000	163,000	—7,000
1953	11,681,000	487,000	307,000	181,000	—1,000
1954	12,177,000	496,000	289,000	195,000	+12,000
1955	12,668,000	491,000	273,000	193,000	+25,000
1956	13,247,000	579,000	364,000	208,000	+7,000
1957	13,848,000	601,000	388,000	221,000	—8,000
1958	14,410,000	562,000	325,000	226,000	+11,000
1959	14,964,000	554,000	329,000	224,000	+1,000
1960	15,567,000	603,000	368,000	231,000	+4,000
1961	16,163,000	596,000	346,000	244,000	+6,000
1962	16,737,000	574,000	353,000	241,000	—20,000
1963	17,354,000	617,000	368,000	237,000	+12,000

[a] Negative figure indicates net loss of civilians to the Armed Forces through induction and enlistment; positive figure indicates net gain of civilians from the Armed Forces through release.

SECTION H.

PUBLIC HEALTH

This section presents statistics relating to public health in California, prepared by the State Department of Public Health.

The sources of data for public health statistics and reports are registration and reporting systems established by law, voluntary reporting systems established with local health agencies, and surveys and special studies conducted or sponsored by the Department.

In interpreting public health statistics, certain limitations must be recognized. Morbidity data are limited by the incompleteness of reporting, the changes made in specific diseases which shall be reported, and by the nature of the incidence of certain diseases in cyclical patterns. The comparability of cause of death data is affected by increasing medical knowledge, changes in classifying disease categories, and changes in international rules for selecting the underlying cause of death.

Crude rates for vital events are influenced by age and sex distributions within the total population. Trend tables for specific causes of death present age-adjusted rates in which the influence of the changing age distribution is removed.

For interpretation of statistics relating to vital events, the following definitions should be noted:

Residence. A person's residence is his usual place of abode. Birth tables by residence refer to the place where the child's mother usually lives. Differing from the census allocation, deaths and births in institutions are allocated to the inmate's previous residence regardless of length of stay in institution.

Occurrence. The place of occurrence is where the birth or death actually occurred.

Live Birth. Live birth is the complete expulsion or extraction from its mother of a product of conception (irrespective of the duration of pregnancy) which, after such separation, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. A fetal death is required to be registered if the 20th week of gestation has been reached.

More detailed statistical information is published annually in the *California Public Health Statistical Report.* Other public health data from program activities, special studies and research projects are also available from the Department of Public Health, 2151 Berkeley Way, Berkeley, California.

TABLE H-1

DEATHS AND RATES, LIVE BIRTHS AND RATES, MARRIAGES AND DIVORCES, CALIFORNIA, 1930-61 [a]

Year	Deaths		Live births		Marriages[b]		Divorces[c]	
	Number	Rate	Number	Rate	Number	Rate	Number	Rate

TABLE H-5

REPORTED CASES AND DEATHS: SELECTED DISEASES, CALIFORNIA, 1961

Disease	Cases	Deaths[a]
Amebiasis	549	5
Brucellosis	20	--
Coccidioidomycosis	211	27
Diphtheria	2	--
Encephalitis, infectious	496	60
St. Louis	*8*	--
Western	*2*	1
Chickenpox	*16*	3
Measles	*98*	11
Mumps	*204*	--
Other etiology	*18*	4
Unknown etiology	*150*	41
Food poisoning (other than botulism)	2,650	1
Hepatitis, infectious	6,189	75
Hepatitis, serum	223	26
Leprosy	19	--
Leptospirosis	4	--
Malaria	14	--
Measlers (rubeola)	39,201	13
Meningococcal meningitis	236	50
Meningitis, viral or aseptic	630	29
Mumps	23,177	7
Poliomyelitis, paralytic	75	4
Psittacosis	10	--
Q fever	29	--
Relapsing fever	8	--
Rheumatic fever	117	62
Rocky Mountain spotted fever	--	--
Salmonella infections	1,416	11
Shigella infections	2,268	6
Streptococcal infections, respiratory	37,125	9
Tetanus	28	13
Trachoma	25	--
Trichinosis	11	--
Tuberculosis	4,916	608
Tularemia	4	--
Typhoid fever	81	1
Typhus fever, endemic	5	--
Whooping cough	1,926	8
Venereal diseases		
Chancroid	104	--
Gonorrhea	22,979	2
Granuloma inguinale	5	--
Lymphogranuloma venereum	14	--
Syphilis, total	7,985	266
Primary and secondary	1,605	--

[a] Deaths shown above may not agree with deaths shown in vital statistics tables since (1) some diseases are not separately listed in the International List of causes of death; (2) definitions of some diseases used for morbidity purposes differ from definitions in the International List of causes of death; and (3) death certificate information is supplemented by epidemiologic data.

NOTE: No cases of the following diseases were reported in 1961: Anthrax, botulism, cholera, dengue, smallpox and yellow fever.

TABLE H-7

DEATHS AND AGE-ADJUSTED DEATH RATES FOR CARDIOVASCULAR-RENAL DISEASES, CALIFORNIA, 1930, 1940, 1950 AND 1960 [a]

Cause of death	1930	1940	1950	1960
	Number			
Total deaths	66,249	80,270	98,583	135,334
Major cardiovascular-renal diseases	25,501	37,593	53,835	71,221
Diseases of the cardiovascular system	21,105	33,001	52,770	70,562
Vascular lesions affecting central nervous system	4,980	6,128	10,224	14,563
Rheumatic fever	68	32	93	45
Diseases of the heart	14,794	24,618	38,193	50,452
Hypertension without mention of heart	9	43	668	735
General arteriosclerosis	1,087	1,875	2,764	2,800
Other diseases of circulatory system	167	305	828	1,967
Chronic and unspecified nephritis	4,396	4,592	1,065	659
	Age-adjusted rate[b]			
Total deaths	1,189.9	1,038.5	810.5	726.6
Major cardiovasular-renal diseases	463.3	473.1[c]	420.2	359.9
Diseases of the cardiovascular system	384.1	414.8[c]	411.5	356.1
Vascular lesions affecting central nervous system	91.1	75.7	78.8	70.4
Rheumatic fever	1.2	0.5	0.8	0.3
Diseases of the heart	268.0	304.4	299.8	258.9
Hypertension without mention of heart	0.2	n.a.	5.2	3.7
General arteriosclerosis	20.5	n.a.	20.1	12.4
Other diseases of circulatory system	3.0	n.a.	6.7	10.4
Chronic and unspecified nephritis	79.3	58.2	8.7	3.8

---

[a] By place of occurrence 1930, 1940; by place of residence 1950, 1960.

[b] Adjusted by direct method to 1940 U.S. population. 1930—10-year age groups to 75 and 75 years and over. 1940-1950-1960, 10-year age groups up to 85 and 85 years and over.

[c] Age-adjusted rates calculated for 10-year age groups up to 65 and 65 years and over.

n.a. Not available.

NOTE: Rates are per 100,000 population. Revision of ISC Code accounts for much of the change in deaths between 1940 and 1950 for Rheumatic Fever, Hypertension without mention of Heart and chronic and unspecified Nephritis.

SECTION I.

LABOR FORCE, EMPLOYMENT, AND EARNINGS

This section presents statistics relating to the civilian labor force of California, including employment, unemployment, hours of work, earnings, apprenticeship, work injuries, union membership, and work stoppages. Employment covered by the Unemployment Insurance Code is regularly reported in *California Employment and Payrolls,* published quarterly by the Department of Employment. Current data on the civilian labor force, civilian employment and unemployment are published monthly in *Employment and Unemployment in California,* issued jointly by the Department of Industrial Relations and the Department of Employment. The Department of Industrial Relations, Division of Labor Statistics and Research, publishes monthly data on nonagricultural employment, average hours worked and average earnings in the *California Labor Statistics Bulletin*; monthly work injury statistics in *Work Injuries in California* and a detailed annual summary in *California Work Injuries;* annual union membership data in *Union Labor in California;* annual data on work stoppages in *Work Stoppages in California;* and information about collective bargaining practices and other industrial relations data in *California Industrial Relations Reports,* issued three or four times a year.

Labor force. The labor force represents the sum of civilian employment and unemployment as defined in the following paragraphs. Caution is urged in comparing the statistics of employment and unemployment contained in this section with those published by the United States Department of Labor. The figures are not strictly comparable because of differences in methods of collection as well as in definitions and concepts.

Total civilian employment. Representing an overall figure of total employment, civilian employment covers the estimated number of employees in nonagricultural establishments, as defined below, plus estimates of employers, own-account workers, unpaid family workers, domestic servants, and agricultural workers.

Nonagricultural employment. The statistics of nonagricultural employment are prepared by the Division of Labor Statistics and Research in cooperation with the United States Bureau of Labor Statistics, and are comparable with national estimates prepared by the United States Bureau of Labor Statistics and with State and area estimates prepared by other states. Excluded are domestic servants, employers, own-account workers, and unpaid family workers as well as agricultural workers. Government employment refers to civilian employees only.

The estimates cover all full- and part-time wage and salary workers (administrative, supervisory, sales, technical, and office personnel, and production workers) who worked during, or received pay for, any part of the pay period ending nearest the 15th of the month. Persons on an establishment payroll who are on paid holidays, paid sick leave, or paid vacations, or who work during a part of a specified pay period and are unemployed or on strike during the other part of the period are considered employed. Persons on the payroll of more than one establishment during the pay period are counted each time reported. On the other hand, persons who are laid off or are on leave without pay, who are on strike for the entire pay period, or who are hired but do not report to work during the pay period are not considered employed. Data for Federal defense establishments generally refer to persons who worked on, or received pay for, the last day of the month; for Federal nondefense establishments and state and local government, data relate to persons who received pay for any part of the pay period ending on, or immediately prior to, the 15th of the month.

Agricultural employment. Estimates of employment in agriculture—including farmers, wage and salary workers, unpaid family workers, and foreign contract workers—are prepared by the California Department of Employment.

Other employment. Estimates of the number of employers, own-account workers, and unpaid family workers in nonagricultural industries are prepared by the Department of Industrial Relations, Division of Labor Statistics and Research, based upon data derived from the U. S. Census of Population and upon various current series such as the number of sales tax permits, number of business and professional licenses, and other available information.

Unemployment. Estimates of unemployment are prepared by the California Department of Employment.

The term unemployment, as used in this series, means all persons who are in the labor market but who for the seven days in a given week have not done any work for pay or profit. To be counted as unemployed a person must be able to work, available for work, and looking for work.

The definition used is broadly comparable with that of the United States Bureau of the Census.

The estimates of unemployment represent the number unemployed during the week which includes the 12th of the month.

Components used in preparing estimates of total unemployment are (a) certified unemployment measured by weeks of unemployment insurance claimed under the California Unemployment Insurance Code minus partial and part-total weeks claimed, (b) estimated number of persons who have exhausted these benefits and remain unemployed, (c) estimated number of unemployed persons who could file for unemployment insurance compensation but do not file or delay filing a claim, (d) unemployed railroad workers as reported by the Railroad Retirement Board, (e) certified unemployment of Federal workers covered under the provisions of the Unemployment Compensation for Federal Employees Act of 1954, (f) estimated unemployment among persons normally employed in industries not covered by unemployment insurance, such as agriculture, State and local government, domestic service, and most nonprofit institutions, and (g) estimated unemployment among recent entrants and re-entrants to the labor force and among the self-employed.

Labor turnover. The Department of Employment develops and publishes labor turnover rates for manufacturing industries for the State as a whole and for the State's major metropolitan areas.

Labor turnover data, which represent the gross movement of wage and salary workers into and out of employment status with respect to individual establishments, are collected from a sample of 3,700 California establishments engaged in manufacturing. The sample covers approximately 65 percent of all manufacturing employment.

Labor turnover information is divided into two broad types: accessions (new hires and rehires), and separations (terminations of employment initiated by either employer or employees). Each type of action is cumulated for a calendar month and expressed as a rate per 100 employees.

Earnings and hours. The Division of Labor Statistics and Research compiles statistics of earnings and hours in all manufacturing and selected nonmanufacturing industry groups in California as a whole and in nine of the major metropolitan areas of the State. These statistics of average weekly earnings, hourly earnings, and hours per week are derived from employment, payroll, and hours information reported by a representative sample of establishments in each industry group.

The averages are based upon data for full- and part-time workers who worked during or received pay for any part of the reported pay period in a given month (usually the week ending nearest the 15th). Included in average earnings are overtime pay and premium wages for late shift work.

Work injuries. The work injury statistics are based upon reports of on-the-job injuries to workers employed in industries covered by the California Workmen's Compensation Act. These reports are filed with the Division of Labor Statistics and Research in compliance with the provision of the California Labor Code. Not covered by the California Workmen's Compensation Act are maritime workers, Federal employees, and railroad workers in interstate commerce.

The injury rate per 1,000 workers employed in each industry division is obtained by dividing the number of disabling injuries reported by the estimated number of wage and salary workers in the industry.

The number of fatal work injuries includes (1) deaths for which findings and award decisions were issued by the Industrial Accident Commission; (2) deaths for which compromise and release settlements were approved by the Commission; and (3) deaths for which liability was accepted by the insurance carrier or self-insurer without an Industrial Accident Commission determination.

The statistics of insured payroll and workmen's compensation benefits are compiled by the California Inspection Rating Bureau, and are on a policy-year basis. The figures do not include the experience of self-insured private and government employers.

The statistics of payrolls and compensation benefits paid by private self-insurers are derived from semiannual reports submitted to the Supervisor of Self-Insured Employers, Department of Industrial Relations. The compensation benefits include amounts paid in the designated calendar year for injuries sustained in the current year and continuing benefits for injuries which occurred in previous years. These figures are not strictly comparable with the statistics of incurred losses contained in Table I-27.

Union membership. California union membership figures are collected by the Division of Labor Statistics and Research by means of the annual Organized Labor Questionnaire.

All unions affiliated with the AFL-CIO or predecessor organizations are included in the membership survey. Unions not affiliated with the AFL-CIO are included if they are known to have written collective bargaining agreements with two or more different employers. Also included are unaffiliated unions with a written collective bargaining agreement with a single employer if the contract covers the employer's operations in more than one location in California and if the union has 1,000 or more members. Unions of government workers, which do not usually execute written collective bargaining agreements, are included if affiliated with the AFL-CIO. An unaffiliated union of government employees is included only if it has members in other states as well as in California.

Work stoppages. The statistics of work stoppages in California are collected by the Division of Labor Statistics and Research in cooperation with the United States Bureau of Labor Statistics.

Included are all known strikes and lockouts involving as many as six workers and lasting the equivalent of a full shift or longer. For statistical purposes a strike is defined as a temporary stoppage of work by a group of employees to express a grievance or to enforce a demand; a lockout is a temporary withholding of work from a group of employees by an employer (or group of employers) in order to induce them to accept the employer's terms. Each concerted action is counted as one stoppage, irrespective of the number of unions, employers, or establishments.

The number of *workers involved* includes all employees in establishments directly involved in a stoppage who are idle for a full shift or longer. Employees in other establishments who are unable to work because of material or service shortages, or for other reasons indirectly connected with the stoppage, are not counted among workers involved. The same worker can be counted more than once in the annual total if he is involved in more than one stoppage during the year.

The number of *mandays idle* is obtained by multiplying the number of workers involved in a stoppage by the number of days or shifts they would normally have worked had there been no stoppage. Allowances are made for fluctuations in the number of workers involved during the period of the stoppage.

[a] Employers not engaged in an exempt activity, who have one or more persons in their employ, and pay wages in excess of $100 during a calendar quarter are subject to the Code. Exempt employment is comprised of agricultural labor; interstate railroad employment; the self-employed; Federal, State, and local government employment; domestic service in private homes; persons in the employ of certain nonprofit organizations; persons in the employ of a son, daughter, or spouse; minors employed by a parent; and certain other small groups of workers. Employers engaged in certain exempt activities may elect coverage under the Code.

[b] Includes "Operative builders."

[c] Excludes "Operative builders."

[d] Omitted to avoid disclosure of confidential information.

NOTE: Industry division and county detail may not add to totals due to rounding.

[a] Does not include employers, own-account workers, unpaid family workers, domestic servants, and agricultural workers.

[b] Detail may not add to total because of rounding.

[c] Includes employees of construction contractors and operative builders; does not include force-account and government construction workers.

[d] Excludes employees of operative builders.

[e] Includes all civilian employees of Federal, State, and local governments regardless of the activity in which the employee is engaged.

Department of Industrial Relations
Division of Labor Statistics and Research

FOOTNOTES FOR TABLE 1-4

[a] These data are based on Social Security Board Industrial Classification Code of 1942 for nonmanufacturing industries and the Standard Industrial Classification Manual of 1945 for manufacturing industries. They are not directly comparable to data in this publication for the year 1960 and later which are based on the Standard Industrial Classification Manual of 1957. Numerically speaking, the only significant changes by industry division brought about by reclassification in January 1958 were increases of two percent in Manufacturing and three percent in Transportation, Communication, and Other Public Utilities and decreases of two percent in Wholesale and Retail Trade and four percent in Service Industries. Further detail concerning effect of reclassification can be obtained from Department of Employment, Research and Statistics Section.

[b] Employers not engaged in an exempt activity, who have one or more persons in their employ, and pay wages in excess of $100 during a calendar quarter are subject to the Code. Exempt employment is comprised of agricultural labor; interstate railroad employment; the self-employed; Federal, State, and local government employment; domestic service in private homes; persons in the employ of certain nonprofit organizations; persons in the employ of a son, daughter, or spouse; minors employed by a parent; and certain other small groups of workers. Employers engaged in certain exempt activities may elect coverage under the Code.

[c] Includes "Operative builders."

[d] Excludes "Operative builders."

[e] Omitted to avoid disclosure of confidential information.

NOTE: Industry division and county detail may not add to totals due to rounding.

[a] Does not include employers, own-account workers, unpaid family workers, domestic servants, and agricultural workers.

[b] Detail may not add to total because of rounding.

[c] Includes employees of construction contractors and operative builders; does not include force-account and government construction workers.

Department of Industrial Relations
Division of Labor Statistics and Research

[d] For industry detail, see Table I-14.

[e] Excludes employees of operative builders.

[f] Includes all civilian employees of Federal, State, and local governments regardless of the activity in which the employee is engaged. For counties included in each metropolitan area, see Table I-22.

[g] Data not available prior to 1958.

---

[a] Does not include employers, own-account workers, unpaid family workers, domestic servants, and agricultural workers.

[b] Includes employees of construction contractors and operative builders; does not include force-account and government construction workers.

[c] For industry detail, see next table.

Department of Industrial Relations
Division of Labor Statistics and Research

[d] Excludes employees of operative builders.

[e] Includes all civilian employees of Federal, State, and local governments regardless of the activity in which the employee is engaged.

[f] Employees of San Francisco City and County included in "city."

[g] Includes employees of State and local public schools.

n.a. Not available.

---

[a] Does not include employers, own-account workers, unpaid family workers, domestic servants, and agricultural workers.

[b] Includes employees of construction contractors and operative builders; does not include force-account and government construction workers.

[c] For industry detail, see next table.

Department of Industrial Relations
Division of Labor Statistics and Research

[d] Excludes employees of operative builders.

[e] Includes all civilian employees of Federal, State, and local governments regardless of the activity in which the employee is engaged.

[f] Employees of San Francisco City and County included in "city."

[g] Includes employees of State and local public schools.

TABLE I-27

AVERAGE WEEKLY AND HOURLY EARNINGS AND AVERAGE HOURS WORKED PER WEEK BY PRODUCTION WORKERS IN MANUFACTURING BY INDUSTRY, SELECTED METROPOLITAN AREAS, 1962 [a]

Metropolitan area and industry	Average weekly earnings	Average hourly earnings	Average hours per week
Los Angeles-Long Beach			
Total manufacturing	$111.93	$2.75	40.7
Total nondurable goods	100.36	2.58	38.9
Food and kindred products	111.54	2.86	39.0
Fish canning and preserving	68.40	2.28	30.0
Meat products	125.44	3.03	41.4
Dairy products	121.91	3.01	40.5
Fruit and vegetable canning and preserving	96.41	2.34	41.2
Grain mill products	116.85	2.62	44.6
Bakery products	116.87	3.10	37.7
Beverage industries	137.41	3.47	39.6
Textile mill products	83.03	2.04	40.7
Apparel and other fabricated textile products	69.19	1.86	37.2
Men's and boys' furnishings, work and sport garments	64.55	1.74	37.1
Women's and misses' outerwear	73.06	1.98	36.9
Women's and children's undergarments	59.97	1.57	38.2
Paper and allied products	109.78	2.62	41.9
Converted paper and paperboard products, except containers and boxes	103.22	2.53	40.8
Paperboard containers and boxes	111.57	2.65	42.1
Printing, publishing, and allied industries	125.66	3.52	35.7
Newspapers	132.44	3.93	33.7
Commercial printing	130.64	3.55	36.8
Chemicals and allied products	110.81	2.67	41.5
Industrial chemicals	126.96	3.03	41.9
Plastics materials and other synthetic materials except glass	113.71	2.74	41.5
Soaps, detergents, and cosmetics	104.00	2.50	41.6
Paints, varnishes, and allied products	112.34	2.72	41.3
Petroleum refining and related industries	125.55	3.04	41.3
Petroleum refining	124.84	3.03	41.2
Rubber and miscellaneous plastics products	106.24	2.56	41.5
Miscellaneous fabricated rubber products	92.10	2.23	41.3
Miscellaneous plastics products	82.00	2.00	41.0
Leather and leather products	67.68	1.80	37.6
Total durable goods	116.75	2.82	41.4
Lumber and wood products, except furniture	113.32	2.84	39.9
Millwork, veneer, plywood, and prefabricated structural wood products	119.87	3.05	39.3
Furniture and fixtures	103.49	2.62	39.5
Household furniture	99.96	2.55	39.2

[a] Excludes experience of approximately 250 self-insured employers.

[b] "Policy year basis": Losses originating under policies effective in a given year are assigned to that year regardless of accident date.

[c] Losses incurred are estimated ultimate loss costs and include not only the amount paid as of the valuation date, but also include estimated amounts to be paid in the future. Detail may not add to total because of rounding.

[d] Excludes pay roll and benefit payments for war production firms insured under "war projects rating plan."

TABLE I-38

AMOUNT OF PAYROLL, COMPENSATION INDEMNITY BENEFITS, AND MEDICAL COSTS PAID BY SELF-INSURERS,[a] CALIFORNIA, 1948-62

(In thousands)

Year	Total payroll	Benefits paid[b] Total	Indemnity benefits	Medical costs
1948	$1,507,539	$4,300	$2,239	$2,061
1949	1,555,200	4,785	2,416	2,369
1950	1,579,970	4,971	2,701	2,270
1951	1,932,512	5,522	2,841	2,681
1952	2,270,466	6,069	3,049	3,020
1953	2,464,626	6,940	3,559	3,381
1954	2,492,623	6,957	3,618	3,339
1955	2,855,339	7,688	3,782	3,906
1956	3,464,339	8,267	3,823	4,444
1957	3,007,550	8,775	4,158	4,617
1958	3,310,426	10,097	5,122	4,975
1959	3,470,289	10,643	5,370	5,273
1960	3,700,389	12,032	6,267	5,765
1961	3,880,493	13,758	7,748	6,010
1962	4,029,415	16,254	9,413	6,841

[a] A few self-insurers carry workmen's compensation insurance policies covering all or a portion of the risk. Self-insurers' losses covered by policies of insurance are included in the table showing benefits paid by workmen's compensation insurance carriers.

[b] Does not include estimated future costs of medical or indemnity benefits.

TABLE I-42

UNION MEMBERS IN CALIFORNIA'S ECONOMIC AREAS JULY 1962

Area	Members	
	Number	Percent of total
Total	1,752,400	100
North Coast	13,200	1
Sacramento Valley	80,100	4
Mountain	32,400	2
San Francisco Bay (9 counties)	559,300	32
San Francisco-Oakland (6 counties)	*466,000*	*27*[c]
San Jose	*77,600*	*4*[d]
Central Coast	27,200	2
San Joaquin Valley	101,400	6
Santa Barbara and Ventura counties	30,300	2
Los Angeles-Long Beach	769,900	44
San Diego	78,700	4
Southeast	59,900	3

Counties included in each area

North Coast—Del Norte, Humboldt, Lake and Mendocino.

Sacramento Valley—Butte, Colusa, Glenn, Sacramento, Sutter, Tehama, Yolo, and Yuba.

Mountain—Alpine, Amador, Calaveras, El Dorado, Inyo, Lassen, Mariposa, Modoc, Mono, Nevada, Placer, Plumas, Shasta, Sierra, Siskiyou, Trinity, and Tuolumne.

San Francisco Bay—Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, and Sonoma.

San Francisco-Oakland—Alameda, Contra Costa, Marin, San Francisco, San Mateo, and Solano.

San Jose—Santa Clara.

Central Coast—Monterey, San Benito, San Luis Obispo, and Santa Cruz.

San Joaquin Valley—Fresno, Kern, Kings, Madera, Merced, San Joaquin, Stanislaus, and Tulare.

Los Angeles-Long Beach—Los Angeles and Orange.

San Diego—San Diego.

Southeast—Imperial, Riverside, and San Bernardino.

PRIVATE EMPLOYMENT AGENCIES

Private employment agencies are licensed by the Division of Labor Law Enforcement, Department of Industrial Relations. The statistics presented in the accompanying tables are limited to general employment agencies and do not include transactions of theatrical and motion picture agencies, artists' managers, and labor contractors. The various fields in which placements were made by general agencies are classified as follows:

Commercial—Includes office, sales, advertising employees, and kindred workers.

Domestic—Includes domestic and personal servants and day workers in homes, except baby sitters.

Baby sitting—Includes and is limited to care of children in private homes, without accompanying domestic duties.

Hotel and restaurant—Includes workers in hotels, bars, restaurants, bakeries, and lunch counters, and kindred workers, not including office employees.

Nursing and medical—Includes practical, vocational and graduate nurses, office nurses, doctors, and other medically trained persons including laboratory technicians.

Teaching—Includes public and private school teachers in all grades.

Technical—Includes laboratory technicians (other than medically-trained), lawyers, engineers, architects, and professional workers generally other than medical.

Miscellaneous—Includes factory workers, laundry workers, garage and service station workers, beauty operators, models, and all others not included in any of the above classifications.

TABLE I-48

PLACEMENTS MADE AND FEES COLLECTED[a] BY PRIVATE EMPLOYMENT AGENCIES, CALIFORNIA, 1935-61

Year	Placements	Fees (In thousands)
1935	146,603	$575.5
1936	207,636	911.4
1937	202,864	1,039.3
1938	150,507	662.4
1939	174,637	830.7
1940	211,416	1,001.8
1941	251,019	1,439.5
1942	198,763	1,637.4
1943	109,257	1,187.9
1944	98,366	1,203.9
1945	118,982	1,187.9
1946	184,566	2,968.0
1947	234,067	3,849.2
1948	256,913	4,287.3
1949	263,791	3,869.0
1950	288,781	$4,485.9
1951	339,899	5,173.3
1952	361,729	5,713.4
1953	396,300	6,234.8
1954	400,803	6,799.8
1955	449,423	7,857.5
1956	489,506	8,604.5
1957[b]	526,551	10,864.1
1958[b]	506,963	10,408.2
1959[b]	568,240	13,405.6
1960[b]	550,529	13,573.9
1961[b]	544,825	13,651.8

[a] Based on annual reports received from general employment agencies; does not include transactions of theatrical and motion picture agencies, artists' managers, and labor contractors. Includes both permanent and temporary placements; therefore no meaningful figure for "average fee per placement" can be derived from these data.

[b] These figures are not strictly comparable to prior years because they include employer paid fees and placements. Figures for prior years include only applicant paid fees and placements.

TABLE I-50

APPRENTICES ACTIVE, REGISTERED, AND COMPLETED, CALIFORNIA, 1952-62

Year	Number of apprentices		
	Active on December 31	Registered[a]	Completed[b]
1952	18,884	8,113	4,587
1953	18,112	9,018	4,018
1954	17,434	7,915	3,411
1955	20,546	11,520	3,503
1956	21,794	10,220	3,482
1957	19,711	8,713	3,950
1958	19,313	8,429	3,991
1959	21,621	11,183	4,004
1960	21,219	9,228	3,840
1961	20,575	8,135	3,844
1962	21,708	9,968	4,330

[a] A registered apprentice is an employed worker who has entered into a written apprenticeship agreement with a joint apprenticeship committee or an employer that has been filed with the California Apprenticeship Council.

[b] A completed apprentice is one who has been issued a Certificate of Completion of Apprenticeship by the California Apprenticeship Council.

Department of Industrial Relations
Division of Apprenticeship Standards

TABLE I-51

APPRENTICES IN SELECTED TRADES[a] ACTIVE AT END OF YEAR AND COMPLETING IN YEAR, CALIFORNIA, 1962

Trade	Number of apprentices	
	Active on December 31	Completed in 1962[b]
Auto Body Fender Repairman	199	36
Automotive Mechanic	694	137
Bricklayer	321	92
Carpenter	5,185	822
Carpet Layer	166	24
Cement Mason	316	99
Compositor	329	90
Electrician	1,817	436
Electronics Technician	108	25
Glazier	256	69
Lather	387	105
Linoleum, Carpet and Soft Tile Layer	265	58
Machinist, General	591	95
Meat Cutter	550	220
Mill and Cabinet Maker	451	108
Painter	1,002	218
Pipefitter	186	31
Plasterer	326	98
Plumber	2,194	335
Pressman, Cylinder	130	44
Refrigeration and Air Conditioning Mechanic	195	38
Roofer	264	66
Sheet Metal Worker	1,612	249
Steamfitter	185	37
Structural Iron Worker	782	70
Surveyor (Chief of Party)	361	38
Tile Setter	130	29
Tool and Die Maker	216	40
Truck Mechanic	120	19

[a] The 29 trades listed are all those with 100 or more active registered apprentices as of December 31, 1962. They accounted for 89 percent of the total of 21,708 apprentices active on that date.

[b] A completed apprentice is one who has been issued a Certificate of Completion of Apprenticeship by the California Apprenticeship Council.

Department of Employment
Research and Statistics

SECTION J.

SOCIAL INSURANCE AND WELFARE

This section presents data relating to State programs providing unemployment and disability insurance, Federal programs administered in California to provide unemployment compensation to veterans and former federal employees and Old-Age, Survivors, and Disability Insurance benefits; federal, state and county programs assisting the aged, the blind, the disabled, and needy children, providing medical care for public assistance recipients and medical assistance for the aged; county programs of general relief; and the state, county and private agency program providing adoption services. There are several principal sources for these data. Current statistics relative to operations are available in the monthly report to the Governor prepared by the Department of Employment and in monthly reports prepared by the Department of Social Welfare. Data on public assistance expenditures and recipients are regularly reported in *Public Welfare in California,* issued monthly by the Department of Social Welfare. Public assistance data are based on reports to the Department of Social Welfare by county welfare departments. Data on medical care recipients and expenditures are reported regularly in *Medical Care Services and Expenditures,* published monthly by the Department of Social Welfare. Public assistance and medical care data are based on reports to the Department of Social Welfare by county welfare departments. Data on adoption services are based on reports to the Department of Social Welfare by the department's area offices, and by county welfare departments and private adoption agencies.

Employment Security. Unemployment insurance and disability insurance activities are reported from 1938, or the inception of each program. Legislation has modified the coverage, benefits, and services under these programs from time to time, and many uses of the data will require reference to the statutory changes. A detailed description of all changes which substantially affect the figures given here has been published by the Department of Employment under the title, *Summary of Major Changes in Program of Department of Employment, 1935-1963.*

Old Age Security. Statistics under this caption relate to financial assistance to persons 65 years of age or over who do not have sufficient financial resources to support themselves. Within limitations, recipients may own real property if it provided some income and keep additional real or personal property as a reserve for future needs. In general, the ceiling on income producing real property is $5,000 net assessed valuation and $1,200 net value on property held as a reserve. There is no limitation on the value of any real or personal property used as a home. The recipient must have lived in California for one year immediately preceding application plus four of the last nine years.

Aid to the Blind. The data relate to financial assistance for blind persons in need who cannot support themselves. The ceilings on financial resources are the same as those in Old Age Security. In addition, the recipient must be at least 16 years of age, must have become blind while residing in California or have resided in California for a specified time (see Old Age Security, above).

Aid to Potentially Self-supporting Blind Residents. These figures describe financial assistance and medical care for persons who, because of blindness, are unable to support themselves, but are working on a plan for self-support. In general, the ceilings on financial resources are $1,200 value of personal property and $5,000 assessed valuation of real property, in both instances "less encumbrances of record." With certain limitations, additional real and personal property may be owned if it is related to a plan for self-support. There is no limitation on the value of any real or personal property used as a home. The age and residence requirements are the same as those for Aid to the Blind.

Aid to Needy Children. The data relate to financial assistance for children under 18 years of age who are in need because of the death, continuous absence, or incapacity of a parent(s). In general, the ceilings in financial resources are $600 value of personal property, less certain encumbrances, and $5,000 assessed valuation of real property, less encumbrances of record. Unless the child was born in California, he or his parent(s) must have resided in California for at least one year before application. Assistance is available for children living in foster homes as well as for children living with a parent(s) or relatives.

Aid to Needy Disabled. Figures under this heading relate to financial assistance and medical care for needy persons who have a major physical or mental impairment that is likely to continue without substantial improvement throughout their lifetime and who need care regularly. Property and residence requirements are the same as in Old Age Security. Recipients must be at least 18 years of age.

Medical Assistance for the Aged. This program, which began January 1, 1962, provides payments for long-term care in hospitals and nursing homes and out-patient after-care, to persons 65 years of age and over who are not recipients of Old Age Security and who are unable to pay for this care from their own funds. The statistics report the number of inpatient and outpatient certificate holders in benefit status, total and average payments by type of care, and source of funds.

General Relief. Data on this subject relate to assistance to needy persons not eligible under state subvented assistance programs listed above. It is administered and financed entirely by counties. Eligibility requirements and standards of assistance vary from county to county.

Adoptions. Services provided by this program include studies of the suitability of adoptive homes, suitability of children for adoption, and recommendations to the courts on granting of adoption petitions. When a child is placed in an adoptive home by an adoption agency (county or private), it is termed a "relinquishment" adoption; when the child is placed directly by the parent, it is termed an "independent" adoption.

TABLE J-1

UNEMPLOYMENT INSURANCE ACTIVITIES, CALIFORNIA, 1938-62 AND BY MONTH, JANUARY 1962-JUNE 1963

Year	Claims filed to open a period of claimant status	Weeks of unemployment certified	Weeks of unemployment compensated	Amount of benefit payments (gross)	Weekly average number with compensated unemployment	Average weekly benefits paid per claimant
1938	680,242	4,200,768	2,467,287	$23,689,687	52,273	$9.63

---

[a] Part 3 of the Unemployment Insurance Code was added in 1959 to provide for payment of extended duration benefits. An extended duration claim may be initiated in any month when the ratio of UI weeks claimed (including extended duration weeks) to covered employment averages 6% or more, in reference periods defined by the Code. This situation first occurred in April 1960.
[b] Includes weeks compensated by Joint UI-UCFE and/or UCX benefits.
[c] Excludes weeks compensated by joint UI-UCFE benefits.
[d] Excludes weeks compensated by joint UI-UCX benefits.
[e] Program effective for months April-November.
[f] Program effective for months March-December. Decrease in number of weeks compensated reflects May 1961 transition of payment for extended periods of unemployment from liability under provision of California Unemployment Insurance Code to liability under provisions of Federal Temporary Extended Unemployment Compensation Act of 1961 (*Cf.* Table J-8).
[g] Increase in number of weeks compensated in April 1962 reflects the assumption of disability under California Unemployment Insurance Code following the final date for filing a new claim under the Federal Temporary Extended Unemployment Compensation Act.

UI—Unemployment Insurance.
UCFE—Unemployment Compensation for Federal Employees.
UCX—Unemployment Compensation for Ex-servicemen.

[a] Effective September 1944, the Servicemen's Readjustment Act of 1944 provided for the payment of allowances to unemployed veterans of World War II. On October 11, 1952, state agencies discontinued processing and paying servicemen's claims for readjustment allowances. Effective October 15, 1952, the Veterans Readjustment Assistance Act of 1952 provided for the payment of allowances to unemployed veterans who served in the Armed Forces sometime during the period June 27, 1950, to February 1, 1955. Unemployment compensation for veterans became inoperative with weeks of unemployment which began on or after February 7, 1960. Effective October 26, 1958, the Ex-Servicemen's Unemployment Compensation program provided unemployment insurance benefits for ex-servicemen who began their active service after January 31, 1955, or who were released from active service in the Armed Forces after October 27, 1958.

[a] Benefits paid to individuals whose rights to UI, UCFE, UCV or UCX benefits had expired or been exhausted. Payments from July 1958 through July 1959 were made under the Temporary Unemployment Compensation Act of 1958, Public Law 441. No benefits were payable for weeks of unemployment beginning on or after April 1, 1959, under the TUC Act. Payments from April 1961 through December 1962 were made under the Temporary Extended Unemployment Compensation Act of 1961, Public Law 87-6. No benefits were payable for weeks of unemployment beginning on or after July 1, 1962, under the TEC Act.

[b] Credit balances are the result of transfers of UI expenditures previously charged to TEC.

UI—Unemployment Insurance.
UCFE—Unemployment Compensation for Federal Employees.
UCV—Unemployment Compensation for Veterans.
UCX—Unemployment Compensation for Ex-Servicemen.

[a] A Medical Care Program for recipients of public assistance was put into effect in California in October 1957 and all expenditures for services received under this program are reported as "Medical Care." Medical care allowed as special needs in recipients' grants prior to October 1957 and grant allowances for services not covered by the Medical Care Program after October 1957 are included in "Subsistence"; data on expenditures for these medical services are not available.

Department of Social Welfare
Research and Statistics

[b] In the two-year period ending June 30, 1950, county funds were contributed only for July-December 1948. Recipients less than 65 years old were included in the period January 1949 through February 1950 (12,091 monthly average).

[c] Based on recipients eligible for Public Assistance Medical Care.

[d] Revised.

---

[a] A Medical Care Program for recipients of public assistance was put into effect in California in October 1957 and all expenditures for services received under this program are reported as "Medical Care." Medical care expenditures for October-December 1957 includes aid to potentially self-supporting blind. Medical care allowed as special needs in recipients' grants prior to October 1957 and grant allowances for services not covered by the Medical Program after October 1957 are included in "Subsistence"; data on expenditures for these medical services are not available.

[b] In the two-year period ending June 30, 1950, county funds were contributed only for July-December 1948.

[c] Based on recipients eligible for Public Assistance Medical Care.

[d] Revised.

---

[a] A Medical Care Program for recipients of public assistance was put into effect in California in October 1957 and all expenditures for services received under this program are reported as "Medical Care." Medical care expenditures for October-December 1957 included in aid to needy blind. Medical care allowed as special needs in recipients' grants prior to October 1957 and grant allowances for services not covered by the Medical Care Program after October 1957 are included in "Subsistence"; data on expenditures for these medical services are not available.

[b] Program started July 1, 1941.

[c] Revised.

---

[a] County nonmedical assistance to recipients in their homes; excludes county supplemental aid to categorical aid recipients (Old Age Security, Aid to Needy Children, etc.)

[b] Includes General Home Relief and other programs administered by County Welfare Departments which are financed from county indigent funds. Generally excludes costs of county hospitals.

[c] Includes some medical and dental care, excluded from General Home Relief after July 1, 1940.

[d] Partly estimated.

Department of Social Welfare
Research and Statistics

[a] General Home Relief is that form of General Relief given to persons in their home to meet one or more of the basic subsistence items of food, shelter, or clothing. The definition of GHR includes residents who are residing in the county. It does *not* include transients since they are by definition persons who are not residing in the county.

Department of Social Welfare
Research and Statistics

---

[a] Includes supplemental aid from county funds.

[b] A Medical Care Program for recipients of public assistance was put into effect in California in October 1957 and all expenditures for services received under this program are reported as "Medical Care." Medical care allowed as special needs in recipients' grants prior to October 1957 and grant allowances for services not covered by the Medical Care Program after October 1957 are included in "Subsistence"; data on expenditures for these medical services are not available.

[c] Based on recipients eligible for Public Assistance Medical Care.

[d] Revised.

n.a. Not available.

[a] Includes supplemental aid from county funds.

[b] A Medical Care Program for recipients of public assistance was put into effect in California in October 1957 and all expenditures for services received under this program are reported as "Medical Care." Medical care allowed as special needs in recipients' grants prior to October 1957 and grant allowances for services not covered by the Medical Care Program after October 1957 are included in "Subsistence"; data on expenditures for these medical services are not available.

[c] Federal participation effective April 1, 1963.

[d] Revsed.

n.a. Not available.

[a] A Medical Care Program for aid to needy disabled recipients was put into effect in California in October 1959 and all expenditures for services received under this program are reported as "Medical Care." Medical care allowed as special needs in recipients' grants prior to October 1959 and grant allowances for services not covered by the Medical Care Program after October 1959 are included in "Subsistence"; data on expenditures for these medical services are not available.

[b] Program effective October 1, 1957.

[c] Based on recipients eligible for Public Assistance Medical Care.

Research and Statistics

[b] Adoption petitions filed for children placed independently of agencies.

SECTION K.

MENTAL HYGIENE

This section presents statistics on the major programs maintained by the State of California for the care and treatment of persons with mental and emotional disorders. The State Department of Mental Hygiene maintains ten hospitals for the care and treatment of patients with mental illness and related psychiatric disorders, two day treatment centers, four hospitals for the custodial care and training of mentally retarded persons, seven State mental hygiene clinics for outpatient treatment, and two neuropsychiatric institutes (associated with the University of California Medical School) for treatment, training of professional personnel, and research.

It should be understood that the prevalence of recognized mental disorder cannot be measured by the statistics in the following tables, since these data are limited to facilities either operated by or subsidized through the Department. Treatment is also offered by licensed private mental institutions in the State, with an inpatient caseload of more than 7,500, by approximately 70 locally operated nonprofit outpatient psychiatric clinics, by city and county general hospitals with psychiatric wards, by three large neuropsychiatric hospitals of the United States Veterans Administration, by public school systems with special classes (particularly for children with mild or moderate mental retardation), and by the large number of psychiatrists in private practice.

More detailed information on the subjects covered by the following tables and other services in the field of mental hygiene is available in periodic and special reports issued by the Department of Mental Hygiene. Additional statistical data on mental hygiene facilities outside the Department are available in periodic reports issued by the Biometrics Branch of the National Institute of Mental Health.

Hospitals for general psychiatry. The majority of patients are admitted to these hospitals through commitment by the county superior courts. The majority of commitments are for the treatment of mental illness, but some are made for chronic alcoholism, drug addiction, and sexual psychopathy. A patient may be released at any time after admission when, in the medical judgment of the superintendent, he has improved sufficiently to permit a return to the community; for sexual psychopaths, the approval of the committing court must also be obtained. Hospitalization ranges from a few days for the treatment of an acute transitory episode to 40 or 50 years for a patient with severe chronic mental illness. The median length of stay prior to discharge is less than three months.

Many counties request observation placement for patients in a State hospital prior to the adjudication of mental illness. About half of these observation placements return to the community without commitment. In some of the counties, the county general hospital provides this service.

Two types of admission do not involve court action: hospitalization may be requested by the county health officer on the certification of two physicians, or voluntarily by the patient at his own request. This last form of hospitalization, which may be terminated by the patient at any time, accounts for an increasing proportion of the total annual admissions. Currently, about one in every five patients is admitted on a voluntary basis. Patients who are committed, of course, can petition the committing court for their release through habeas corpus proceedings.

Patients may be released from the hospital by leave of absence, with continued extramural supervision by psychiatric social workers of the Department. About one-half of the leave placements are successfully closed by discharge and about one-half are returned to the hospital for further treatment. Departures without staff permission are classified as unauthorized absences, usually involving patients who have almost completed their convalescence and have complete freedom of the hospital grounds; in most instances the patient either returns to the hospital, or the case is continued under extramural supervision or closed by discharge.

For many types of patients the case is closed by direct discharge at the time the patient is released from the hospital. Finally, cases are also closed by death in the hospital.

Hospitals for mentally retarded. A patient is considered eligible for admission only if the parent or guardian, the county authorities, and the hospital medical staff are in complete agreement that hospitalization is best for the patient and for his family. Following the determination of eligibility, admission may be delayed for periods ranging from a few days to several years, depending upon the relative urgency of the case; on June 30, 1962, there were 2,300 cases awaiting admission.

Unlike mental illness, mental retardation is relatively incurable. Thus patients with severe mental retardation usually receive lifetime custodial care. On the other hand, the mildly mentally retarded participate in training and rehabilitation programs and in hospital maintenance activities, and thus are able to return to useful lives in the community after only a few years.

Community Mental Health Services. Patients having neurological or emotional disorders who can benefit from psychiatric treatment while remaining in their communities are served by the seven state-operated mental hygiene clinics, by aftercare clinics located at six of the state hospitals for general psychiatry and at one hospital for the mentally retarded, and by the outpatient departments of the two neuropsychiatric institutes at San Francisco and Los Angeles. More recently, community psychiatric services have been made available at outpatient, inpatient, and psychiatric rehabilitation facilities administered by cities or counties where part of the costs of operation are met by state subvention under the Short-Doyle Act for Community Mental Health Services.

Psychiatric services rendered by such clinics include diagnostic evaluation, psychological testing, individual interview psychotherapy, group psychotherapy, and family-centered therapy, as well as treatment through the use of psycho-pharmaceuticals and electric shock. In addition, the majority of these clinics offer consultation and informational services to both professional and lay groups in the local community.

Inpatient care offered by cities and counties is limited to short-term evaluation or treatment. Reimbursement under the Short-Doyle Act may not cover hospitalization in excess of 90 days.

[a] Through 1945, limited to commitments and voluntary admissions of patients without previous hospitalization in any state or federal mental hospital. Patients admitted for 90-day observation without commitment were included in 1946, and patients admitted for brief court observation without commitment were included in 1954. In 1955-58, a first admission was defined to include patients with no previous care in any public or private mental hospital. Beginning in 1959, first admissions comprised those patients with no previous hospitalization in a California State hospital. All changes in legal classification are excluded. (See footnote on Table K-2).

SECTION L.

EDUCATION

This section presents data compiled by the Bureau of Education Research of the California State Department of Education relative to public school enrollment, apportionment, personnel, and current expenditures for public school education. Higher education data relate to all public and independent colleges.

Actual enrollment. This term describes the number of pupils registered on October 31 of the indicated year. Enrollment information is collected semiannually on October 31 and March 31, dates when schools are well under way and the enrollment furnishes a good cross section of the number of youngsters actually in school during the semester. The data given here are as of October 31. Previous to 1947, enrollments were collected on an accumulative enrollment basis. Data are not furnished previous to 1947 since they would not be comparable to the enrollment information furnished here. Accumulative enrollments previous to 1947 are available from the Bureau of Education Research upon request. The K-14 enrollments indicate kindergarten through grade fourteen; K-8, kindergarten through grade eight; and the high school enrollment includes grades nine through twelve; and junior college, grades thirteen and fourteen. Special enrollments, or enrollments in special classes, are defined by footnotes.

Detailed information on actual enrollments by individual grades, by county, on each classification included in the special enrollments, and on the number of pupils on half-day sessions, are published semiannually by the State Department of Education.

The higher education enrollments include the public junior colleges (also reported with public school enrollments), the state colleges, the University of California, and independent colleges and universities. The Bureau of Education Research began the first complete compilation of higher education enrollment data in 1954-55. This accounts for the fact that the information as furnished here covers only a seven-year span. Full-time enrollment includes enrollment in twelve or more units. Freshman means less than 30 semester units of recorded credit, sophomore from 30 to 59 units, junior from 60 to 89, senior means more than 90 units, and graduate students are students with a baccalaureate degree from a recognized four-year college.

A specific distribution of enrollments in higher education, in terms of distribution by year and by individual institutions, is published by the Department of Finance, Budget Division.

Apportionment average daily attendance. This is the average daily attendance which is used to apportion state school funds. For this purpose, the elementary average daily attendance includes kindergarten through grade eight, irrespective of the location of the grades. Accordingly, grades seven and eight in the junior high schools are included in the elementary level. The high school average daily attendance indicated in this table includes grade nine through twelve, irrespective of location, and the junior college grades thirteen and fourteen.

The apportionment average daily attendance is in the annual publication of the State Department of Education entitled *Apportionment of the State School Fund for the Fiscal year. . .* A detailed breakdown in terms of individual districts and in terms of county totals may be obtained from this source.

Apportionment of state funds to public schools. These figures give a distribution of the principal apportionment which includes both basic and equalization financial aid to each of the levels (elementary, high school, and junior college). Also included is the apportionment which is made to the county school service fund, i.e., the operation of the office of the County Superintendent of Schools. Data relative to the apportionment for growth are indicated separately. The state apportionment to schools is made on the basis of the previous school year's average daily attendance. Apportionment for growth attempts to compensate for the growth in the subsequent school year by providing schools financial assistance in terms of their current average daily attendance. Special apportionments include reimbursements for transportation, driver education, and excess cost for physically and mentally handicapped. A detailed explanation of each of these funds and the legal basis for its allocation is furnished in the annual publication of the State Department of Education entitled *Apportionment of the State School Fund for the Fiscal Year. . .*

Current expenditures. The figures given here include total expenditures made by the school districts from (1) local funds, raised chiefly through property taxes, (2) the monies apportioned to the districts by the State and, (3) Federal funds (approximately 3%). These expenditures include only expenditures from the general fund of the school district, but do not include general fund expenditures for food services, community services and capital outlay. Special funds, such as building fund, bond interest and redemption, etc., are not included. Expenditures are furnished in terms of district organization, i.e., the expenditures in terms of the elementary districts, high school districts, junior college districts, and unified districts. The unified district column indicates the total expenditures for unified districts, including all levels which are encompassed by unified districts. In some instances this is kindergarten through grade twelve, and in other instances, kindergarten through fourteen. All of the expenditures of the unified districts are included in this column and are not indicated in the other column designations.

Full-time personnel. This figure is the total number of full-time personnel in the public schools, exclusive of substitute or other part-time teachers. The number of full-time personnel in California public schools are available in *Salaries of Certificated Employees in California Public Schools*, published annually by the Bureau of Education Research.

TABLE L-10

ENROLLMENTS OF TOTAL AND FULL-TIME STUDENTS IN PUBLIC JUNIOR COLLEGES, STATE COLLEGES, UNIVERSITY OF CALIFORNIA, AND INDEPENDENT COLLEGES AND UNIVERSITIES, 1954-55 TO 1961-62

Fall semester	Total	Public junior colleges		State colleges	University of California	Independent colleges and universities
		Legally defined adults[a]	Enrollment in grades 13 and 14 and specials			
Total enrollment:						
1954	329,306	108,073	86,437	45,206	34,880	54,710
1955	354,989	111,774	99,410	52,943	38,167	52,695
1956	399,216	125,786	114,923	62,785	40,313	55,409
1957	444,767	135,185	132,694	72,083	42,039	62,766
1958	495,767	154,242	147,941	81,030	43,478	69,076
1959	517,101	164,894	146,900	87,844	44,878	72,585
1960	561,032	188,485	151,564	95,081	49,162	76,740
1961	611,352	194,463	175,570	105,858	54,265	81,196
1962	664,518	204,818	197,828	118,057	58,616	85,199
Full-time enrollment:						
1954	162,663	----	63,019	29,234	32,563	37,847
1955	181,113	----	70,165	33,910	37,035	40,003
1956	192,338	----	74,082	38,338	37,522	42,396
1957	209,109	----	80,913	41,582	39,444	47,170
1958	227,095	----	91,425	44,679	41,166	49,825
1959	233,707	----	90,254	49,473	42,386	51,594
1960	257,301	----	99,783	56,480	46,801	54,237
1961	285,295	----	112,636	64,099	51,340	57,220
1962	309,794	----	121,283	71,502	55,775	61,234

[a] One who has attained his 21st birthday on or before February 1, of semester and who has enrolled in less than 10 *class* hours. Also, all those in classes maintained in a state institution, jail, or road camp.

TABLE L-11

TOTAL ENROLLMENT OF STUDENTS IN THE FOUR SYSTEMS OF HIGHER EDUCATION BY LEVEL, FALL 1962

System	Total enrollment	Lower division	Upper division	Graduate[a]	Other
Public Junior Colleges	336,704	305,959	--	--	30,745
California State Colleges	118,057	41,806	49,133	26,723	395
University of California	58,616	20,418	19,311	18,358	529
Independent Colleges and Universities[b]	85,199	35,307	22,563	21,149	6,180

[a] Definitions of graduate student are not entirely comparable.

[b] Part of increase in total enrollment and lower division is due to the inclusion of schools of nursing for the first time in this year's report.

SECTION M.

CRIME, CRIMINAL JUSTICE, AND DELINQUENCY

This section presents summary tables showing the number and procedural movement of persons under commitment to the two State correctional agencies, the Departments of Corrections and Youth Authority.

Data relating to the Department of Corrections start with the year 1945, and those for the Youth Authority start with 1946, the years in which central statistical controls were established.

No data are presented on crimes committed, persons arrested, or the procedures of criminal justice. These data, to be meaningful, must be given in more detail, and require more explanation and qualification than would be appropriate in this volume. The interested reader is referred to the publications of the Bureau of Criminal Statistics, Department of Justice, for such data. The first of these, *Crime in California*, presents data on felony crimes, felony arrests, and juvenile arrests, as reported by sheriffs and police, and on the procedures and results of prosecution in the superior courts, as reported by district attorneys. *Delinquency and Probation in California* presents data on the characteristics of, and procedures applied to (1) juveniles referred to county probation departments, (2) persons referred by superior and juvenile courts to the Youth Authority and, (3) convicted persons referred by superior courts to their respective probation officers. *California Prisoners* describes the characteristics and movement through prison and parole of adult persons convicted of felonies and committed to the Department of Corrections.

In the Department of Corrections, the California Rehabilitation Center was established by 1961 legislative action. This Center, opened September 15, 1961, is for the confinement and treatment of narcotic addicts civilly committed to the Department under Penal Code Chapter 11.

[a] Includes all wards placed by Youth Authority in State and local institutions.

[b] Beginning in 1957, wards on furlough are shown as part of the resident population; movements to and from furlough are therefore not shown as population movements. Starting again in 1962 the wards on furlough were not considered as part of the resident population.

[c] Beginning in 1962, wards on furlough were changed from an institution status to other. Affected were 5 wards on furlough at the end of 1961.

SECTION N.

PERSONAL INCOME

Estimates of personal income received by residents of each state are prepared annually by the National Income Division, Office of Business Economics, in the United States Department of Commerce. Data are available, by years and types of income, back to 1929 in *Personal Income By States.* Totals and details for the most recent years are reported in the August issue of the *Survey of Current Business.* Quarterly estimates of personal income in California, at annual rates, comparable to the United States Department of Commerce series, are prepared by the Budget Division of the State Department of Finance. Mimeographed reports of this information are available upon request.

An understanding of the conceptual basis of income estimates is essential to the use of these data and it is assumed that users interested in sources of basic information, estimating techniques, definitions, and limitations of these data will consult the Department of Commerce reports mentioned above. Particular note should be taken of the facts that income (1) represents receipts before payment of income taxes and certain non-tax charges, and (2) includes nonmonetary income, such as imputed net rental values of owner-occupied homes and payments in kind rather than cash. As defined, residents include individuals, nonprofit institutions, private trusts, and private pension, health and welfare funds. Nonprofit institutions include religious organizations, clubs, labor organizations, nonprofit schools and hospitals, charitable, welfare, and other private nonprofit agencies furnishing services to individuals.

Briefly stated, the following are comprised in the six categories of income shown here:

Wage and salary disbursements. Monetary remuneration of employees, including commissions, tips, bonuses, etc., and payments in kind.

Other labor income. Employer contributions under private pension, health, welfare and group insurance plans, compensation for injuries, pay of military reservists, directors' fees, etc.

Proprietors' income. Net business earnings of owners of unincorporated enterprises, including farmers and such professional practitioners as doctors, dentists, and lawyers.

Property income. Rental income of persons (including royalties on patents, copyrights, and rights to natural resources and imputed net rents), personal interest incomes (including certain imputations), and cash dividends.

Transfer payments. Receipts from government and business for which no service is rendered currently: pensions, unemployment benefits, disability benefits, direct relief, bad debts absorbed by business establishments, corporate gifts to private nonprofit institutions, etc.

Personal contributions for social insurance. Employee contributions for old age and survivors insurance, unemployment insurance, and public employee retirement systems. Includes similar contributions for such purposes by self-employed individuals. Personal contributions for social insurance are deducted in estimating personal income, since wage and salary disbursements are reported including amounts withheld by employers for this purpose.

The source report shows total and per capita incomes by types and major sources in greater detail than is shown in this Abstract, industrial sources of personal income, total and per capita disposable income (after direct personal taxes and certain nontax payments) and ratios which cannot be reproduced here for reasons of space.

Estimates of personal income, by counties, are prepared by the Economic Development and Research Department of the California State Chamber of Commerce.

Personal income tax data. Personal income tax returns are required of single persons with gross incomes of $5,000 or more or net incomes of $1,500 or more and of married persons with gross incomes of $5,000 or more or net incomes of $3,000 or more. For the period 1950-1958, the net income filing requirement was $2,000 for single persons and $3,500 for married persons.

Personal income tax tables are classified by adjusted gross income class intervals. Adjusted gross income includes salaries and wages (less certain unreimbursed expenses incurred in connection with employment), dividends, interest, annuities, a percentage of net gains or net losses from the sale or exchange of capital assets, gains or losses from the sale or exchange of property other than capital assets, rents and royalties less expenses attributable thereto, gross receipts from business less costs of goods sold and business expenses, and distributive shares of partnership gross income, alimony and separate maintenance payments, pensions, income from life insurance and endowment contracts, income from discharge of indebtedness, income in respect to a decedent, and income from interest in an estate or trust.

Sampling techniques have been used to derive most of the data appearing in the tables presenting the number of personal income tax returns and the amount of adjusted gross income.

It is evident, of course, that much of the personal income is received by persons who had insufficient amounts of gross income and net income to necessitate their filing state returns or is exempt from state taxation (e.g., dividends on veterans' government insurance, federal and state social security benefits, railroad retirement benefits, workmen's compensation for personal injuries or sickness, interest on federal bonds, etc.). Conversely, there are items of taxable income which are not included in the personal income concept such as gains from sales of assets and alimony. Hence, the data on taxable income are not strictly comparable to those on personal income.

TABLE N-1

NUMBER OF PERSONAL INCOME TAX RETURNS, ADJUSTED GROSS INCOME, AND TAX ASSESSED, CALIFORNIA, 1935-61 [a]

SECTION O.

PRICES AND COST OF LIVING

This section presents the Consumer Price Index for Los Angeles, San Francisco, California, and the United States. In addition, a summary of the California Industrial Welfare Commission's *Budget for a Self-Supporting Working Woman* is presented.

Consumer Price Index—The index measures the average change in prices of goods and services purchased by city wage-earner and clerical-worker families.

The indexes for Los Angeles, San Francisco, and the United States are those compiled by the United States Bureau of Labor Statistics. The index for California has been computed by the California Department of Industrial Relations, Division of Labor Statistics and Research, as the weighted average of the Los Angeles and San Francisco indexes. The weights used are proportional to the populations of the Los Angeles and San Francisco areas.

Current figures for Pacific Coast cities are published regularly by the Regional Office, United States Bureau of Labor Statistics, San Francisco.

Industrial Welfare Commission Budget for a Self-Supporting Working Woman—The Industrial Welfare Commission is responsible for establishing a legal minimum wage for women and minors in California under provisions of the Labor Code which stipulate that the minimum wage fixed by the Commission "Shall not be less than a wage adequate to supply the necessary costs of proper living to, and maintain the health of such women and minors."

The Industrial Welfare Commission of the California Department of Industrial Relations formulated the working woman's budget to measure the standard implied in the law—that of decent, healthful living at a minimum cost. In stipulating budget items, the Commission considered the needs of a single working woman, 35 years of age or older, in reasonably good health, who is entirely self-supporting, who works in a store or an office, and who works within the same transportation zone in which she lives. For the purposes of the Budget, the Commission stipulated that the woman shares a 3-room apartment with another woman, each paying one-half the cost of rent, utilities, and household operations.

The Budget was priced by the Division of Labor Statistics and Research, Department of Industrial Relations. The total cost of the Budget represents a composite of prices in five areas of the State: the Los Angeles-Long Beach Metropolitan Area, the San Francisco-Oakland Metropolitan Area, and the cities of San Diego, Fresno, and Lodi.

SECTION P.

ELECTIONS

Information relating to registrations and voting is presented in this section. In interest of space the data are limited to registrations, by principal political parties, the total vote cast, and a statement of the vote for major candidates for the offices of President, United States Senator from California, and the constitutional officers of this State. A complete accounting of registrations, the vote for all candidates (including representatives in Congress, State senators, assemblymen and judicial officers) and the vote cast for and against all ballot propositions is given by the Secretary of State in *Statement of Vote,* a booklet issued after each primary and general election.

All eighty members of the Assembly and half of the forty State senators are elected each even numbered year. Constitutional officers are elected for four-year terms in the even numbered years which are not leap years. Thus, there is a vote on high elective office, either presidential or gubernatorial, at each general election.

According to reports of the United States Bureau of the Census, there were 7,092,000 civilians in California aged 21 years and over on April 1, 1950. Registrations for the general election of that year totaled 5,244,837 and there were 3,845,757 votes cast. By April 1, 1960 the number of civilians of voting age had risen to approximately 9,660,000. Registration for the general election of 1960 totaled 7,464,626 and there were 6,592,591 votes cast. It must be recognized that civilian population and registrations are not entirely comparable. Some individuals of proper age do not possess other voting qualifications and members of the Armed Forces may vote, if they have the residence and other qualifications. However, these population figures provide a general background against which to interpret registration and voting data.

TABLE P-1

REGISTRATION AND VOTE CAST IN CALIFORNIA, PRIMARY ELECTIONS, 1930-62

Year	Registration				Vote cast
	Total	Democratic	Republican	Other	
1930	2,187,474	449,824	1,599,413	138,237	1,301,847

Secretary of State

SECTION Q.

PUBLIC FINANCE

Data relating to the financial operation of governmental agencies in California are summarized in this section. The information is arranged according to the level of government, starting with the Federal and running through special districts. In general the purpose is to present figures on revenues, expenditures and debt, with additional details on each of these subjects where these can be readily prepared in summary form. Supplementary information is available in the files and records of the several contributing agencies.

A warning should be given against adding either revenues or expenditures of the several governmental levels and treating the result as the aggregate income or outgo of governments in California. A great deal of money passes from one level to another in the form of subventions and other intergovernmental payments. Consequently there is a substantial duplication in these figures which can be eliminated only after careful examination of the various items involved. Differences among governmental agencies in accounting practices, especially in regard to disbursements from proceeds of bond issues, also will require attention in any meticulous use of these data.

Federal taxation and expenditures. Annual reports of the United States Commissioner of Internal Revenue are the source of statistics on Federal tax collections in California. Collections within a particular state are not an accurate measure of the burden of Federal taxes paid by the people of that state. For example, 60 percent of the cigarette tax is collected in North Carolina and more than 80 percent of the motor vehicle excise tax is paid in Michigan. But the burden of these taxes is carried by cigarette smokers and vehicle users in all states. The ratio of Federal tax collections to the burden of Federal levies varies with changes in the tax structure, economic conditions and other factors. In general, however, the burden upon Californians exceeds the volume of Federal taxes collected here by ratios ranging between 10.4 percent[1] and 17.4 percent.[2] One of the most recent surveys indicated that in 1957-58 the estimated burden of Federal taxes in California exceeded gross collections by 13.6 percent.[3]

Data on Federal tax refunds, by states, are available for the last four fiscal years and they show an average refund of 8.5 percent of gross collections in California. This ratio should be kept in mind in connection with the data in Tables Q-1 and Q-2 which are reported on a gross basis.

Complete data on Federal expenditures by states are not available, but payments by the Federal government to state and local governments and transfer payments to individuals, organizations etc. are reported by states in the *Annual Report of the Secretary of the Treasury on the State of the Finances.* Amounts for California in selected recent years have been transcribed in two tables for this section. Attention is directed to the numerous footnotes in each annual report which because of space limitations cannot be repeated in this Abstract.

State revenues, expenditures and bonded debt. The summaries here presented are based upon budget classifications of State revenues and expenditures,

TABLE Q-1

FEDERAL INTERNAL REVENUE COLLECTION IN CALIFORNIA,[a] 1929-30 TO 1961-62

(In thousands)

Year ending June 30	Total	Individual income and employment taxes[b]	Corporation income and profits taxes	Estate and gift taxes	All other
1930	$149,288	$61,541	$64,342	$5,491	$17,914

1951	3,558,227	2,292,653	727,717	63,409	474,448
1952	4,645,285	3,021,223	1,032,753	77,982	513,327
1953	5,287,729	3,433,932	1,177,218	90,095	586,484
1954	5,356,963	3,500,860	1,229,834	95,098	531,171
1955	5,184,128	3,456,777	1,101,537	87,951	537,863
1956	6,008,419	4,042,676	1,278,008	109,432	578,303
1957	6,643,780	4,544,025	1,300,555	151,684	647,516
1958	6,753,950	4,682,940	1,208,303	167,354	695,353
1959	6,923,618	4,893,235	1,175,999	141,743	712,640
1960	7,997,711	5,745,594	1,298,097	187,713	766,307
1961	8,486,217	6,071,062	1,380,810	188,405	845,940
1962	9,091,751	6,606,127	1,390,195	232,782	862,647

[a] Receipts in the various states do not indicate the Federal tax burden, since taxes collected in one state are, in many instances, borne by residents of another. For example, the withholding taxes reported by employers situated near state boundaries include substantial amounts withheld from salaries of employees residing in neighboring states.
Data for 1959 through 1962 indicate that approximately 8.5 percent of gross collections in California are refunded.

[b] Individual income and employment taxes, reported separate through 1951, cannot be segregated in recent reports.

General note: Original reports from which these data were compiled contain extensive footnotes. These should be consulted by users interested in continuity of these series, comparability and other details.

with total income and outgo carried back to the 1929-30 fiscal year and detail provided for the period since 1939-40. Additional information may be obtained from the *Annual Report of the State Controller* and the *State Budget.* The last two entries shown in each table are estimates contained in the Governor's Budget as submitted to the Legislature.

Aggregate fiscal year revenues, segregated by general and special funds, are shown in Table Q-5. For the most part, general fund receipts are derived from broad levies and charges not earmarked for particular purposes, while special fund receipts are dedicated for use in special services. Sales, personal income and corporation taxes are examples of the former; motor vehicle taxes and fees, which must be used for activities related to highways, roads and streets, are the leading special fund levies. Receipts from some revenue sources are apportioned by law between the general fund and certain special funds. Since 1929-30 there have been a few changes in the fund designation of receipts, and in this respect the totals are not strictly comparable throughout the period covered.

Table Q-6 shows revenue collections from each of the principal sources, without regard to fund. Data shown for the years prior to 1949-50 are taken from records of the State Controller. Amounts shown for 1949-50 and subsequent years represent accruals during the year to the collecting agency. Permit fees required in connection with such levies as the sales and motor vehicle fuel taxes are included with other receipts from these levies.

Expenditure data are summarized in accordance with the three principal sections of the budget; (1) State operations, which includes the expense of maintaining the various departments, boards, commissions and offices—including the legislative and judicial branches; (2) capital outlay—representing the cost of acquiring land, constructing and equipping new facilities, highway construction and similar expenditures; and (3) local assistance, which comprises State

payments to local governments. Under State accounting practice, disbursements from proceeds of bond issues are treated as expenditures at the time the bonds are redeemed. Hence, initial payments from bond funds are not included in these totals.

Expenditures for the principal functions of government include amounts for all three of the general purposes mentioned above—State operations, capital outlay and local assistance.

The functional classification of State expenditures was revised in 1962 in order to conform this reporting so far as possible to the agency concept of governmental organization. The new classification is shown in Table Q-9, with one year, 1960-61, overlapping both Tables Q-8 and Q-9. Detailed information regarding the activities and services comprising each function may be obtained from budget summaries.

Information regarding the State's bonded debt, as reported by the State Treasurer, is arranged to show both the general trend since 1929-30 and a detailed statement of California's State bonded debt as of June 30, 1960. Short term obligations, chiefly in the form of treasury warrants outstanding in various amounts between 1933 and 1942, are not included.

The State Treasurer and the California Bonding Program. The State Treasurer's responsibilities in-

clude the receiving of and receipting for all moneys deposited in the State Treasury; paying all warrants or checks issued by the State Controller and other State agencies; investing of funds and accounts under the Pooled Money Investment Board, of which he is the Chairman, as well as providing investment advice and negotiating purchases and sales of securities for other State funds or agencies; maintaining custody of all money and securities belonging to or held in trust by the State; preparing, selling, servicing and redeeming all State general obligation bonds.

The State Treasurer, under policies set out by the Pooled Money Investment Board, maintains an average cash balance for the calendar year 1963 of $46,000,000 in demand accounts with various banks in the State to compensate them for servicing all of the banking needs of various State agencies. More than 4,700,000 State Controller warrants and agency checks totaling $13.8 billion were redeemed by the State Treasurer during the 1962-63 fiscal year.

During the 1962-63 fiscal year, the Treasurer's investment staff handled 1,397 securities investment transactions with a dollar volume of $7.2 billion for funds administered under the Pooled Money Investment Board. Earnings on these investments for the year were $30,623,696.

Trust activities of the Treasurer's Office continued to increase during the year. On June 30, 1963, securities held for State funds, those deposited by banks to secure bank deposits and other pledges with State agencies, and safekeeping items, totaled over $4.4 billion.

The California bonding program is designed to provide financing for public building needs and growth. Approximately two-thirds of the general obligation bonds authorized by the electorate have been self-liquidating bonds serviced by certain earmarked receipts other than general tax sources. The State of California in over a century of bond financing has never defaulted in a bond payment.

The State of California continues to benefit greatly from the flexible bond selling policy established by the State Treasurer. The bids accepted at the April 10, 1963 sale of $100 million State Construction and School Building Aid Bonds resulted in a net interest cost to the State of less than 3%. This is the first time since 1958 that a bid of less than 3% was offered on a major sale, and more significantly, the bids were well below the national index for the third consecutive sale. Before the Treasurer's success in restoring competitive bidding, California had been paying 30 to 35 basis points above the national index in marketing its major bonds. The lower net interest costs have meant millions of dollars saved over the life of the bonds.

Veterans' Farm and Home Loan Bonds—Current projections indicate that no additional bond authorizations will be presented to the electorate until 1966 at the earliest. As of June 30, 1963, $60 million of the 1960 bond authorization remains unsold, in addition to the $250 million authorized by the voters in the November 1962 election. In the four-decade span of the Cal-Vet program there have been 200,291 loans made. Of these 69,519 loans have been repaid in full and 131,402 contracts are still in force, representing a total investment of almost two billion dollars. The Cal-Vet program is entirely self-supporting—the administration of the program and the bond repayments are made entirely by the participating veterans.

State School Building Aid Bonds—Population growth in California has continued the demand for new classroom facilities for elementary and high school pupils. A total of $1,335,000,000 in school aid bonds has been authorized by the voters since 1949; as of June 30, 1963, $1,085,000,000 has been sold. Since 1947, facilities have been provided to house 1,370,000 elementary and high school pupils. The percentage of pupils on half-day session in state-aided districts has

Department of Finance
Budget Decision

dropped from 23 percent in 1955 to 4.4 percent in 1962. The demand for State aid is expected to increase in 1963 after a slight reversal in 1961-62.

State Construction Program Bonds—The demand continues high for additional building structures and facilities for higher education and institutional building for the mentally ill and correctional confinement. The State's current five-year plan predicts minimum building needs for State agencies will total more than $750 million to keep pace with the growth. Over five-sixth of the total requirements is for higher education, primarily on the campuses of the University of California and the State College System. The voters in the general election of November, 1962, authorized a $270 million issue of State Construction Bonds.

San Francisco Harbor Improvement Bonds—The San Francisco Port Authority has invested over $100 million in land and improvement without a cent of public cost or subsidy. Of the $50 million issue authorized by the voters in November, 1958, $27,500,000 remains unsold. The Port Authority operates 12½ miles of piers and other waterfront facilities with an annual trade of more than five million tons.

Small Craft Harbor Bonds—The $10 million of Small Craft Harbor bonds authorized in 1958 have all been sold. The proceeds of these bonds have been made available for loans to cities, counties and districts for the acquisition, construction, improvement, maintenance or operation of small craft harbors and related facilities. Revenue received from operation of these facilities will repay the principal and interest on the loans. The bonds issued by the State Treasurer under this program are self-liquidating.

Water Development Program Bonds—The "California Water Plan" includes a thorough inventory of all the water resources of the State, an evaluation of present and future requirements for water for all purposes throughout the State, and formulation of plans for the orderly, balanced development of California's water. The plan guides and co-ordinates the planning, construction and operation by all agencies of the works required to control, protect, conserve and distribute all the State's water resources. The first sale of the $1,750,000,000 of General Obligation Bonds authorized by the voters in 1960 under the Burns-Porter Act, to provide funds to assist in the construction of the California Water Plan, were offered August 7, 1963.

Local tax levies upon tangible and intangible property are tabulated for each general level of government, i.e., counties, cities, school districts and other special districts. Because the City and County of San Francisco occupies a dual role, data for this jurisdiction are shown separately.

TABLE Q-7

STATE EXPENDITURES, BY PURPOSE, CALIFORNIA, 1929-30 TO 1963-64

(In thousands)

Year ending June 30	Total	State operations	Capital outlay	Local assistance
1930	$114,169	$42,244	$25,531	$46,393
1931	120,841	46,741	24,085	50,016

1960	2,085,584	634,665	239,527	1,211,391
1961	2,525,394	722,937	503,921	1,298,537
1962	2,406,218	778,959	275,626	1,351,633
1963[a]	2,859,908	886,248	474,723	1,498,937
1964[a][b]	2,945,028	963,197	329,871	1,651,960

[a] As shown in the 1963-64 State budget submitted to the Legislature.

[b] Expenditures, after giving effect to legislative action at the 1963 General and First Extraordinary Sessions, total $2,994,311.

Source: Data for 1930-45 from *Biennial Report of the State Controller,* except capital outlay for highways, not segregated in the Controller's reports, from *Seventh Annual Report of the Division of Highways,* page 234. In determining highway capital outlay, contributions from non-State sources were excluded. The resulting estimate for each year was deducted from total highway expenditures as reported by the Controller, and the remainder was treated as maintenance, administrative expense, etc., included under "State operations." Data for the period since 1945 from State budgets. All figures adjusted to present budget classifications.

Department of Finance
Budget Division

Average tax rates are presented in Table Q-22 for all levels except special districts, which are included in the totals but not shown separately. The levies for each level of government in each county and the average tax rate for the several counties are shown for the 1960-61 fiscal year in Table Q-19 and for the 1961-62 fiscal year in Table Q-20. The average tax rates and the ratios of assessed value to market value in each of the counties and the state as a whole are shown in Table Q-21 for the past three fiscal years. If anyone desires to compute the average tax burden per hundred dollars of market value for any county, it can be done by multiplying the average tax rate by the assessed value.

A wealth of information regarding financial transactions of local governments is contained in a series of reports by the State Controller. For earlier years these data were contained in one report,[3] but recently the detail has been expanded and the material has been published in several annual volumes.[4] Data on aggregate receipts, expenditures and bonded debt of these jurisdictions are summarized in a series of eight tables prepared especially for this Abstract. In this connection, it may be noted that the City and County of San Francisco is included in the city, rather than county, totals.

No attempt has been made to incorporate here data from various reports of the State Legislature in the fields of taxation and public finance. However, these comprise an important part of the State's financial record, especially in the interpretation of official data, and should not be overlooked by persons interested in more detail than can be shown in this Abstract.

---

[a] The functional classification of State expenditures was revised in 1962 to conform more closely to the agency concept of governmental organization. For years prior to 1962, figures have been revised to fit the new categories. Principal changes effected in Table Q-9 are: (1) the inclusion of bond interest and redemption under the functions for which the debt was incurred, rather than in "Other" expenditures; (2) inclusion of the Department of Mental Hygiene under "Health and Welfare," rather than combining these expenditures with those of the Departments of Corrections and Youth Authority; (3) combining under "Public Safety" the Disaster Office, Department of Justice, Military Affairs (all formerly classified as "Other" expenditures), Veterans Affairs and Fire Marshal (both formerly in "Social Welfare and Public Health"); (4) showing as "Business and Commerce" the expenditures of regulatory and licensing agencies (formerly in "Other"); and (5) showing separately as "Employment Relations" the Department of Industrial Relations and expenditures from State funds by the Department of Employment.

[b] As shown in the 1963-64 State Budget submitted to the Legislature.

1962	26,506,000	6.82	1,807,749

[a] Includes value of materials in State used for the purpose of repairing, improving, or operating the cars; excludes value of fixed properties of private car lines.

[b] Includes penalties for failing to file timely returns.

Note: Beginning in 1938, owners of private cars operated over railroads (sleeping cars, refrigerator cars, and tank cars are typical of this type of property) became subject to property taxation for state purposes under the provisions of the Private Car Tax Law. Prior to 1938 this property was taxed locally.

This tax is administered by the Board of Equalization, which, on or before the third Monday in August, levies a tax computed at the preceding year's average rate of property taxation in the State. Section 11403 of the Revenue and Taxation Code provides that the board shall compute the average rate of taxation in the State by adding the taxes of counties, cities, school districts, and other special districts (but not special assessments) and dividing the amount obtained by the total assessed valuation in the State of property subject to county taxation. Legally speaking, this is the only state property tax currently levied, though the vehicle license fee is classified by the Bureau of the Census as a property tax.

Board of Equalization
Research and Statistics

1961	4,065,461	257,075	2,297,863	1,508,523
1962	4,206,140	257,033	2,384,905	1,564,202

[a] From 1938 to date, excludes the value of railroad cars operated by private car companies, which are subject to exclusive state taxation.

Note: In 1933 a constitutional amendment was adopted which required that the Board of Equalization assess the properties of railroad, express, telegraph, telephone, gas, electric, and car line companies, as well as intercounty pipe lines, flumes, canals, ditches, and aqueducts. The property so assessed (first used for extension of 1935-36 taxes) was to be taxed to the same extent and in the same manner as other property.

Prior to 1935 public utilities were exempt from local taxation on their operating properties (except for service of local debts outstanding in 1911) by reason of their payment of a state tax on gross operating revenues, and their nonoperating properties were assessed locally.

1962	4,416,543	114,990	4,301,553

[a] In 1935, the intangible property subject to taxation was notes, debentures, shares of capital stock (less the pro rata value of corporate property taxed in the State), bonds, solvent credits (less debts of similar nature owed to residents), deeds of trust, and mortgages, except intangibles secured by land in the State. Since 1935, solvent credits (less debts of similar nature owed to residents) have been the only taxable intangibles. The definition of solvent credits was constricted in 1957; the term now means credits unsecured by land, arising out of the sale of goods or services, other than notes, bonds, debentures, and intercorporation advances or deposits between affiliated corporations. Solvent credits are taxed at 1 mill per dollar. The proceeds of the solvent credits tax are divided equally among the county, the city, and the school district if the situs of the property is within an incorporated municipality and equally between the county and the school district if not.

[a] Excludes special assessments levied on limited categories of property to finance activities from which such properties derive special benefits.

[b] County school service tax levies and levies for junior college tuition are imposed by the county but were tabulated as school district levies until the 1951-52 fiscal year, when school service tax levies were shifted to the county column, and 1953-54, when both types of levies were tabulated as county levies.

Note: Ad valorem taxes are levies on all taxable real and personal property as it exists at 12 o'clock noon on the first Monday in March. To the assessed valuation of taxable property are applied the tax rates of the several taxing jurisdictions within which the property is situated.

[a] In 1935, the intangible property subject to taxation was notes, debentures, shares of capital stock (less the pro rata value of corporate property taxed in the State), bonds, solvent credits (less debts of similar nature owed to residents), deeds of trusts, and mortgages, except intangibles secured by land in the State. Since 1935, solvent credits (less debts of similar nature owed to residents) have been the only taxable intangibles. The definition of solvent credits was constricted in 1957; the term now means credits unsecured by land, arising out of the sale of goods or services, other than notes, bond, debentures, and intercorporation advances or deposits between affiliated corporations. Solvent credits are taxed at 1 mill per dollar. The proceeds of the solvent credits tax are divided equally among the county, the city, and the school district if the situs of the property is within an incorporated municipality and equally between the county and the school district if not.

---

[a] Includes utility roll, and locally-assessed secured and unsecured rolls at county assessment levels.

[b] Includes junior college tuition levies and levies for recovery of school equalization aid loss.

[c] Excludes special assessments levied on limited categories of property to finance activities from which such properties derive special benefits.

[d] Computed by dividing total levies by the assessed value and multiplying by 100.

TABLE Q-22

AVERAGE TANGIBLE PROPERTY TAX RATE,[a] BY LEVEL OF GOVERNMENT, 1938-39 TO 1962-63

(Rate per $100 of assessed value)

Fiscal year	Total [b] levies	City and County of San Francisco levies	Other county [c] levies	Other city levies [d]	School district [c] levies
1938-39	$4.06	$3.40	$1.44	$1.66	$1.32
1939-40	4.13	3.27	1.50	1.63	1.37
1940-41	4.18	3.53	1.49	1.65	1.39
1941-42	4.26	3.60	1.49	1.66	1.44
1942-43	4.05	3.67	1.41	1.63	1.32
1943-44	3.89	3.63	1.26	1.64	1.31
1944-45	4.03	3.70	1.26	1.67	1.43
1945-46	4.31	3.70	1.40	1.74	1.55
1946-47	5.12	4.24	1.81	1.83	1.84
1947-48	5.02	4.26	1.70	1.69	1.91
1948-49	5.45	4.41	1.88	1.69	2.16
1949-50	5.44	4.38	1.76	1.65	2.27
1950-51	5.81	4.67	2.02	1.72	2.36
1951-52	5.74	4.52	1.88	1.71	2.42
1952-53	5.79	4.13	1.86	1.69	2.52
1953-54	5.94	4.47	1.94	1.73	2.54
1954-55	6.15	5.14	2.02	1.72	2.63
1955-56	6.27	5.25	2.09	1.67	2.67
1956-57	6.49	5.10	1.99	1.66	3.00
1957-58	6.72	5.26	2.05	1.61	3.17
1958-59	6.96	5.61	2.11	1.56	3.32
1959-60	7.26	5.95	2.19	1.61	3.48
1960-61	7.42	6.18	2.39	1.59	3.61
1961-62	7.65	6.13	2.24	1.58	3.79
1962-63	7.82	6.83	2.25	1.60	3.90

[a] Computed by dividing the total taxes levied by each level of government by the net total assessed value of tangible property within its jurisdiction.

[b] Includes the rates of special district taxes, which are not separately shown.

[c] County school service tax levies and levies for junior college tuition are imposed by the county but were tabulated as school district levies until the 1951-52 fiscal year, when school service tax levies were shifted to the county column, and 1953-54, when both types of levies were tabulated as county levies.

[d] Computed by dividing city tax levies by the assessed value of tangible property inside cities as shown on county assessment rolls. Slightly lower rates would result from the use of assessed values as shown on city assessments rolls in the cities which do their own assessing. For example, in 1962-63, the average city rate was $1.54 when computed by the latter method.

---

[a] Computed by dividing total levies, both secured and unsecured, by the total taxable assessed value and multiplying by 100. The weighted average tax rate may fall outside the range of the secured code area tax rate if the rates applicable to the valuation on the unsecured roll differ sufficiently from the secured roll rates; e.g., in Alpine and San Francisco counties.

[b] Rates applicable to land only or to land and improvements only are not included.

Board of Equalization
Research and Statistics

1961-62	2,681,290	2,656,565	3,880,247

[a] The information in the series is not strictly comparable. For the Fiscal years 1939-40 through 1952-53 information is taken from the report prepared by counties, including only selected districts and not, in all cases, all of the information concerning the activities of a given district. For the fiscal years 1953-54 to date, the information is taken from separate reports of the financial transaction of districts. For districts other than school districts, the types of districts included were increased from fiscal year 1953-54 through 1955-56 as the program of the reporting for districts was expanded.

Office of State Controller
Division of Local Government Fiscal Affairs

The figures for bonded indebtedness include time warrants as well as certain long term contractual obligations between special districts and the Federal Bureau of Reclamation.

[b] Indebtedness for school and special districts from fiscal year 1953-54 to date include school purpose bonds which are an obligation of the City and County of San Francisco and not of the school district. Listing within this table is for information purposes only. For 1953-54 $44,405,000; 1954-55 $45,826,000; 1955-56 $43,147,000; 1956-57 $41,458,000; 1957-58 $44,289,000; 1958-59 $44,115,000; 1959-60 $46,840,000; 1960-61 $44,990,000; 1961-62 $44,225,000.

Bond Section

SECTION R.

BANKING AND FINANCE

This section presents bank, savings and loan association, and insurance statistics.

The bank statistics were supplied by the Federal Reserve Bank of San Francisco, Research Department. The savings and loan statistics were made available by the Federal Home Loan Bank of San Francisco. Additional data may be obtained from these sources.

The State Superintendent of Banks issues an annual report on the financial condition of State Banks.

The insurance statistics are prepared by the California Department of Insurance. Detailed information is published in the Annual Report of the Insurance Commissioner, available from the Department.

SECTION S.

TRADE AND SERVICE

This section presents information on wholesale and retail trade in California as these are reflected in taxable sales data and in the department store sales index of the Federal Reserve Bank of San Francisco, and on the services as reflected by the licensing activities of the State agencies which examine and license professional and vocational personnel and establishments.

Taxable sales data. Detailed statistics are given on the number of outlets and the amount of taxable transactions of establishments licensed by the State Board of Equalization to sell tangible personal property. The data are shown for retail stores classified by the type of business, for personal service establishments, for contractors and manufacturers and wholesalers of building materials, and for all other outlets. Data are shown for two or more years by type of business for the State as a whole, totals for each county and city, and also by type of business for each of California's 8 most populous counties and for 34 cities and 18 counties whose annual retail store sales in 1963 are expected to exceed $100 million. In general, outlets are classified according to the seller's principal line of business, using the Standard Industrial Classification developed by the United States Bureau of the Budget. Certain types of businesses selling only merchandise not subject to sales tax are not licensed and, consequently, are not represented in the statistics. The principal exclusions are establishments selling only food for home consumption, such as produce markets, meat and seafood markets, poultry stores, dairy stores, bakeries, etc.

The taxable transactions of retail stores may not be the same as their gross receipts because not all of their transactions are subject to sales tax. The principal exemptions from the tax are the sales of (a) food for home consumption, (b) gasoline, which is subject to the motor vehicle fuel license tax, (c) utility services when delivered to consumers through mains, lines, or pipes, (d) animal life, feed, seeds, plants, and fertilizers when used for the production of food for humans, (e) newspapers and periodicals and (f) prescription medicines. For a complete list of exemptions see section 6351 through 6404 of the Revenue and Taxation Code of California. Also not included in taxable transactions are service charges, a source of receipts of many retail stores and all service establishments.

The statistics also include purchases of equipment, fixtures, supplies, and material from outside of the State on which use taxes are reported and paid by the purchasers.

The Board of Equalization publishes quarterly reports containing outlet and taxable sales data by type of business for the State as a whole, for 56 counties and for 128 of the largest cities of the State as determined by the dollar volume of taxable transactions during the 1960 calendar year as reported by retail stores. It also publishes outlet and taxable sales data for the retail stores and for all outlets for each of its 380 cities. In 1960 the First Annual Report of outlet and taxable sales data was issued by the board. This series contains even more detail on taxable sales by type of business than the quarterly reports.

Licensed professional and vocational personnel and establishments. Statistics are presented giving the numbers of licensed professional and vocational personnel and the licensed establishments based on operating statistics of the Department of Professional and Vocational Standards. The growth of activity in the licensed professions and vocations can be inferred from the data presented, but it must be noted that no direct measure is available of the volume of professional and vocational services provided by the licensees.

Department store sales index. As part of a Federal Reserve System program, the Federal Reserve Bank of San Francisco prepares a monthly press release giving department store sales indices for the Twelfth Federal Reserve District and selected states, areas, and cities. These indices reflect daily average retail sales at all stores meeting the definition of a department store in the Standard Industrial Classification. A probability sample is not used in collecting data, but coverage of 89 per cent of total department store sales in California and higher coverage in most of the smaller areas (based on the 1954 Census of Retail Trade) gives a good measure of sales activity at these stores. The nonreporting department stores are reflected in the index by means of a "blow-up" factor derived at the time of benchmark adjustments, the latest being obtained from the 1954 Census of Retail Trade. In 1951, in addition to the adjustment to 1948 benchmark data, a major revision of the department store series was made including adopting 1947-1949 daily average sales as the base period. A detailed discussion of the methods used in preparing the indices and a detailed description of the 1951 revision and of the adjustment to the 1954 benchmark data are given in the December 1951 and December 1957 issues of the *Federal Reserve Bulletin.* The indices were intended as an indicator of movements in total retail sales when the series was started in 1919. Changes in the structure of the retail sector since that time have made the department store series alone less useful for this purpose. When combined with other retail trade statistics, however, it can be used as a means of obtaining estimates of consumer expenditures.

Port Statistics. The dollar value of foreign trade, as compiled by the United States Department of Commerce, is presented for the three customs districts in California. Leading imports are coffee, crude petroleum, newsprint, autos and trucks, copra and crude rubber. Major exports are raw cotton, industrial machinery, food products, petroleum products, iron and steel mill items, and dairy products.

The statistics on tonnage of inbound and outbound oceanborne cargo were prepared by the United States Army, Corps of Engineers.

Other information sources on California world trade and shipping are the San Francisco World Trade Center Authority and the San Francisco Port Authority, both State of California agencies.

Hardware stores	2,040	2,033	2,030	2,034
New motor vehicle dealers	3,314	3,134	3,124	3,172
Used motor vehicle dealers	3,020	2,843	2,925	3,138
Automotive supplies and parts dealers	2,407	2,164	2,328	2,369
Service stations	16,540	16,939	17,680	18,276
Trailer, boat, motorcycle, and plane dealers	864	841	872	1,009
Itinerant and mail-order vendors	8,127	8,704	9,144	9,407
Personal service establishments	45,015	47,899	49,922	51,688
Contractors and manufacturers or wholesalers of building materials	16,639	17,932	19,158	20,195
All other manufacturing, wholesaling, and miscellaneous outlets	74,768	79,601	83,682	85,819

[a] Includes all manufacturers, wholesalers, and retailers of tangible personal property except those dealing solely in commodities (such as cereal products) the retail sales of which are exempt from tax.

Note: In 1953, grocery stores and eating and drinking places were reclassified according to types of alcoholic beverages sold; used car dealers were split out of the new and used car dealer class; and candy and tobacco stores were combined into a single class.

All other manufacturing, wholesaling, and miscellaneous outlets	85,819	94,949	99,322	104,323	118,221[b]	120,778[b]

Board of Equalization
Research and Statistics

[a] Includes all manufacturers, wholesalers, and retailers of tangible personal property except those dealing solely in commodities (such as cereal products) the retail sales of which are exempt from tax.

[b] Not strictly comparable with figures for prior years because part-time business operations formerly included with "Itinerant and mail-order vendors" have been reclassified and are now part of the "all other manufacturing, wholesaling, and miscellaneous outlets" class.

Note: Data for 1956 are repeated to present the subtotals resulting from the new groupings of food stores, candy and tobacco stores and building materials yards and stores.

[a] Self-assessed taxable sales reported by concerns doing business in California and self-assessed purchases of Californians subject to use tax. Does not include board-assessed sales, which over the period covered by the table ranged from $20,000,000 to $110,000,000 a quarter. Does not include sales of gasoline and other high-test motor vehicle fuel, sales of food for off-premises consumption, sales of water, electricity, and gas when delivered through pipes or wires, and other tax-exempt sales.

Itinerant and mail-order vendors	93,580	96,854	319,151	30
Grand totals	$10,727,574	$11,130,753	$15,643,974	71

[a] State and local sales tax is computed at 3½ percent of the figure in the preceding column. Federal retailers' excise taxes collected by the California Directors of Internal Revenue in the 1954-55 Fiscal Year were added as follows: taxes on furs, to apparel and accessories stores; on jewelry, to jewelry stores; on toilet goods, to drug stores; and on luggage, to other specialty stores.

[b] Includes hay, grain, and feed stores.

[c] Includes news dealers and newsstands.

[d] Includes bicycle stores.

NOTE: Because of inherent differences in the contents of the figures being compared, the over-all ratio of 71 percent is not significant. By removing from both sets of figures the sales of food stores and service stations, a much better comparison is obtained. The remaining dollar volumes then become $9,988,670,000 for self-assessed taxable transactions adjusted for sales and excise tax collections and $10,692,143,000 for census-reported sales, and the ratio becomes 93.4. This appears to be a reasonably high ratio since the census figure, even after the modifications indicated, still contains a considerable volume of non-taxable receipts.

Itinerant and mail-order vendors	131	145	149	164	172	128[c]	161[c]
Personal service establishments	648	694	726	855	926	972	1,025
Contractors and manufacturers or wholesalers of building materials	1,594	1,544	1,571	1,852	1,786	1,860	1,957
All other manufacturing, wholesaling, and miscellaneous outlets	3,908	4,246	4,002	4,629	4,831	4,950[c]	5,304[c]

---

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Prescription drugs sales were exempted from the sales tax effective January 1, 1962.

[c] Not strictly comparable with figures for prior years because part-time business operations formerly included with "Itinerant and mail-order vendors" have been reclassified and are now part of the "all other manufacturing, wholesaling, and miscellaneous outlets" class.

Note: Data for 1956 are repeated to present the subtotals resulting from the new groupings for food stores, candy and tobacco stores and building materials yards and stores.

Itinerant mail-order stores	149,069	155,032	438,504	35

---

[a] State and local sales tax is computed at 4 per cent of the figure in the preceding column. Federal retailers' excise taxes collected by the California Directors of Internal Revenue in the 1958-59 fiscal year were added as follows: taxes on furs, to apparel and accessories stores; on jewelry, to jewelry stores; on toilet goods, to drug stores; and on luggage, to other specialty stores.

[b] Includes retailers of plumbing and electrical supplies, glass, and wall paper stores.

[c] Includes second-hand stores.

[d] Includes hay, grain, and feed stores.

[e] Excludes musical instruments stores and jewelry stores normally included in specialty stores group and includes tobacco stores whose sales are normally reported with those of packaged liquor dealers.

Note: Because of inherent differences in the contents of the figures being compared, the over-all ratio of 72 per cent is not significant. By removing from both sets of figures the sales of food stores and service stations, a much better comparison is obtained. The remaining dollar volumes then become $12,336,694,000 for self-assessed taxable transactions adjusted for sales and excise tax collections and $13,048,737,000 for census-reported sales, and the ratio becomes 94.5. This appears to be a reasonably high ratio since the census figure, even after the modifications indicated, still contains a considerable volume of non-taxable receipts. Incidentally, this ratio is a full percentage point higher than the comparable one for 1954.

---

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Tax-exempt retail sales, comprised principally of sales of food for off-premises consumption and of gasoline, are not included in this tabulation.

[c] Included with "Grocery stores selling all types of liquor."

[d] Included with "New motor vehicle dealers."

Board of Equalization
Research and Statistics

[e] Prescription drug sales were exempted from the sales tax effective January 1, 1962.

[f] Not strictly comparable with figures for prior years because part-time business operations formerly included with "Itinerant and mail-order vendors" have been reclassified and are now part of the "all other manufacturing, wholesaling, and other miscellaneous outlets" class.

---

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Tax-exempt retail sales, comprised principally of sales of food for off-premises consumption and of gasoline, are not included in this tabulation.

[c] Included with "Grocery stores selling all types of liquor."

[d] Included with "New motor vehicle dealers."

Board of Equalization
Research and Statistics

[e] Prescription drug sales were exempted from the sales tax effective January 1, 1962.

[f] Not strictly comparable with figures for prior years because part-time business operations formerly included with "itinerant and mail-order vendors" have been reclassified and are now part of the "all other manufacturing, wholesaling, and miscellaneous outlets" class.

n.a.—Not available.

---

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Tax-exempt retail sales, comprised principally of sales of food for off-premises consumption and of gasoline, are not included in this tabulation.

[c] Included with "Grocery stores selling all types of liquor."

[d] Included with "New motor vehicle dealers."

[e] Prescription drug sales were exempted from the sales tax effective January 1, 1962.

[f] Not strictly comparable with figures for prior years because part-time business operations formerly included with "Itinerant and mail-order vendors" have been reclassified and are now part of the "all other manufacturing, wholesaling, and miscellaneous outlets" class.

---

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Tax-exempt retail sales, comprised principally of sales of food for off-premises consumption and of gasoline, are not included in this tabulation.

[c] Included with "Grocery stores selling all types of liquor."

[d] Included with "New motor vehicle dealers."

[e] Prescription drug sales were exempted from the sales tax effective January 1, 1962.

[f] Not strictly comparable with figures for prior years because part-time business operations formerly included with "Itinerant and mail-order vendors" have been reclassified and are now part of the "all other manufacturing, wholesaling, and miscellaneous outlets" class.

1949	157,625	6,431	15,073	206	16,104
1950	162,484	6,909	14,535	293	18,592
1951	168,226[c]	7,140	12,958	290	18,773
1952	175,512[c]	7,852	15,227	292	19,025
1953	182,269[c]	8,532	16,900	350	19,708
1954	181,095[c]	10,176	15,453	341	19,704
1955	185,740[c]	10,008	15,848	463	20,953
1956	195,446[c]	10,358	17,024	560	22,571
1957	203,349[c]	10,575	16,978	619	23,010
1958	217,086[c]	11,338	17,247	659	23,757
1959	230,439[c]	11,983	17,786	804	26,019
1960	232,404[c]	15,201	17,006	915	27,456
1961	238,306[c]	16,435	17,828	996	29,243
1962	251,695[c]	17,464	16,696	1,074	31,304

[a] Figures in this table represent taxable distributions and are compiled from the monthly tax returns of the taxpayers. Because the tax liability attaches at the time alcoholic beverages are sold by manufacturers or importers rather than at the time a retail sale is made or when the consumption occurs, the above data are referred to as *apparent* consumption figures rather than as *actual* consumption figures.

[b] The division of still wines between table and dessert wines was estimated by applying to total apparent consumption of still wines the percentages reported for the second half of 1937. The tax rate was the same for both types of still wine until July 1, 1937; hence the two types were not separately reported on tax returns.

[c] Includes a relatively small amount of tax-exempt beer distributions to the Armed Forces. Prior to June 1951 such distributions were taxable.

SECTION T.

BUSINESS INVESTMENTS AND PROFITS

This section presents corporate business activity and income data reported on returns filed with the Franchise Tax Board.

Corporations doing business in California and those having income from California sources but not technically doing business here are subject to the Bank and Corporation Tax Law. Chapter 2 of the law imposes the bank and corporation franchise tax and Chapter 3 the corporation income tax.

The bank and corporation franchise tax is imposed for the privilege of doing business in California and is according to or measured by the amount of net income earned in or allocable to the State in the preceding fiscal or calendar year. A corporation conducting a unitary business both within and without the State applies an allocation factor to its income in order to determine the amount subject to state taxation. The standard allocation formula is the arithmetic average of three factors—the ratio of California sales to total sales, the ratio of California payrolls to total payrolls, and the ratio of California property to total property. For the period 1935-1958, the basic bank and corporation franchise tax rate was 4 percent and the minimum franchise tax $25 a year. For 1959 and subsequent years, the rate was set at $5\frac{1}{2}$ percent and the minimum tax, with limited exceptions, was increased to $100. Banks are exempt from paying the minimum tax.

The corporation income tax applies to corporations that derive income from California sources but do not engage in intrastate business in California. The corporation income tax rate is also $5\frac{1}{2}$ percent (4 percent for 1958 and earlier income years) but there is no minimum tax. Data for these corporations have been omitted from Tables T-1 to T-4. For 1961, they numbered only 1,536, reported $20,219,514 net income taxable in California, and paid $1,100,380 in corporation income taxes.

Returns for fiscal years ending within a calendar year are included with returns for that calendar year.

TABLE T-1

NUMBER OF BANK AND CORPORATION FRANCHISE TAX RETURNS REPORTING NET INCOME, NET INCOME REPORTED FOR STATE TAXATION, AND STATE TAX ASSESSED, CALIFORNIA, 1936-61 [a]

Year	Number of returns	Net income reported for state taxation	Tax assessed [b]
1936	11,514	$385,108,007	$17,781,001
1937	11,593	458,816,621	20,728,030
1938	10,195	359,952,319	16,536,260
1939	11,095	399,678,689	18,164,792
1940	11,987	483,040,304	21,806,105
1941	13,248	831,906,353	35,888,738
1942	13,868	1,318,172,329	55,221,205

---

[a] Includes returns received through approximately the end of November of the succeeding year.

[b] As allocated to State for tax purposes.

[c] Includes ordnance and accessories, tobacco manufactures, and other manufactures not listed elsewhere.

Franchise Tax Board
Statistical Division

[d] Includes building and loan associations, savings and loan associations, and financial corporations not elsewhere classified. (Insurance companies are not subject to franchise taxes.)

[e] Includes highway, railroad, car and express, water, and airline utilities.

[f] Includes water, wharfage, carloading, stevedoring, warehousing, cold storage, and pipeline companies.

SECTION U.

TRANSPORTATION

Statistics relating to the mileage of roads, expenditures to construct and maintain these roads, gallons of fuel used, and traffic and accident data on rural State highways are maintained and were compiled for publication by the Highway Planning Survey of the Division of Highways, Department of Public Works.

The Highway Planning Survey inventoried all roads outside the incorporated areas during the period 1949-55. The counties are required to maintain the inventory of the roads under their jurisdiction and report changes in mileage in May of each year. Roads outside cities not maintained by the State or counties, shown in the accompanying tables, are based on the 1949-55 inventory.

For State highways the mileage shown is the official mileage as of December 31 for the latest year available.

The accident statistics contained in this report are based upon fatal and injury accidents involving a motor vehicle. The reports from which these statistics are compiled are those required to be reported to the California Highway Patrol under Section 20008 of the Vehicle Code. Accidents involving "property damage only" are not required to be reported and, consequently, do not reflect an accurate total.

In addition to the accident data contained in this report for 1962, the Department of California Highway Patrol also received an additional 2,499 reports of motor vehicle accidents which occurred on private property. These accidents resulted in death for 179 persons and injury to 2,843 persons.

TABLE U-1

STATE HIGHWAY MILEAGE,[a] BY SURFACE TYPE, DECEMBER 31, 1961

Surface type	Total	Outside cities	Inside cities
Total	16,354.862	14,247.261	2,107.601
Total constructed road	14,128.488	12,394.536	1,733.952
Portland cement concrete	1,587.155	1,054.743	532.412
High type bituminous	8,800.158	7,697.120	1,103.038
Low type bituminous	2,281.538	2,243.471	38.067
Oiled earth, gravel	1,241.045	1,236.002	5.043
Graded & drained earth	60.899	60.899	--
Bridges	157.693	102.301	55.392
Unconstructed road	2,226.374	1,852.725	373.649

[a] Centerline mileage only which does not include nonadd mileage such as frontage roads, connections, etc.

TABLE U-13

REGISTRATIONS OF MOTOR VEHICLES AND TRAILERS IN CALIFORNIA, BY VEHICLE TYPE, 1950, 1958-62

Type of Vehicle	1950	1958	1959	1960	1961	1962
Total	5,043,368	8,061,118	8,191,338	8,681,162	9,007,869	9,758,075[e]
Rate per 100 population[a]	46.4	53.7	52.6	53.7	53.7	56.1
Exempt[b]	67,072	97,528	104,767	111,867	118,009	110,570
Non-exempt	4,976,296	7,963,590[d]	8,086,571	8,569,295	8,889,860	9,647,505[e]
Passenger vehicles	4,076,484	6,268,271	6,371,875	6,751,313	6,982,930	7,549,332
Commercial vehicles	481,809	938,128	928,153	982,821	1,029,816	1,135,161
Trailers and Semi-trailers	363,055	480,235	498,838	525,667	544,816	579,720
Trailer Coaches	[c]	213,939	218,927	233,904	249,087	276,951
Motorcycles	54,948	63,017	68,778	75,590	83,211	106,341

[a] California total population at end of each calendar year.

[b] Vehicles owned by public agencies not subject to license fees.

[c] Data for Trailer Coaches prior to 1958 is included in the totals for Trailers and Semi-trailers.

Department of Motor Vehicles
Research and Statistics Section

[d] Includes 336,601 (224,371 autos, 61,948 trucks, 48,036 trailers, and 2,246 motorcycles) renewal registrations for 1959 due to a change in the method of reporting.

[e] As a result of increased early renewals in 1962 due to the issuance of new vehicle license plates for the 1963 registration year, 1962 renewal totals are somewhat inflated.

As of December 31	All licenses	Operators licenses	Chauffeurs licenses	Drivers licenses[b]	Rate per 100 population[a]			
					All licenses	Operators licenses	Chauffeurs licenses	Drivers licenses[b]
1946	4,317,230	3,956,823	360,407	--	58.1	53.3	4.9	--
1947	4,696,925	4,264,305	432,620	--	62.3	56.5	5.7	--
1948	4,935,122	4,507,748	427,374	--	64.4	58.8	5.6	--
1949	5,053,913	4,637,318	416,595	--	65.4	60.1	5.4	--
1950	5,132,118	4,699,097	433,021	--	66.3	60.8	5.6	--
1951	5,414,512	4,949,526	464,986	--	68.2	62.3	5.8	--
1952	5,731,726	5,225,896	505,830	--	69.5	63.4	6.1	--
1953	6,049,373	5,537,232	512,141	--	71.1	65.1	6.0	--
1954	6,315,255	5,844,957	470,298	--	72.0	66.7	5.4	--
1955	6,585,172	6,156,244	428,928	--	72.8	68.0	4.7	--
1956	6,915,110	6,520,524	394,586	--	73.7	69.5	4.2	--
1957	7,260,446	6,871,305	389,141	--	74.7	70.7	4.0	--
1958	7,526,436	7,122,540	403,896	--	75.0	70.9	4.0	--
1959	7,843,314	7,420,916	422,398	--	75.6	71.5	4.1	--
1960	7,952,056	7,512,635	439,421	--	74.2	70.1	4.1	--
1961	8,157,358	7,173,283	427,920	556,155	73.6	64.7	3.9	5.0
1962	8,541,854	5,150,386	322,141	3,069,327	74.5	44.9	2.8	26.8

[a] Estimated civilian population aged 16 years and over at end of each calendar year. Age breakdown for years 1946-1961 estimated from data contained in *California's Population in 1961*, Department of Finance, July 1961. 1962 estimates derived from *California's Population in 1962*, Department of Finance, July 1962.

[b] Effective September 15, 1961, issuance and renewal of Operators and Chauffeurs licenses were discontinued under a new law providing for only the one license category of "Drivers License."

TABLE U-20

DRIVER CONTROL ACTIONS, BY TYPE OF ACTION, CALIFORNIA, 1951-62

Year	All types	Probation[a]	Suspension[b]	Revocation[c]	Cancellation[d]
1951	33,320	5,431	19,434	6,464	1,991
1952	38,876	7,903	20,860	8,183	1,930
1953	43,074	9,236	21,856	10,271	1,711
1954	46,756	13,120	22,757	9,029	1,850
1955	57,938	16,988	27,065	11,945	1,940
1956	55,834	11,257	29,718	12,952	1,907
1957	64,037	16,989	30,673	13,799	2,576
1958	80,183	24,199	35,659	18,225	2,100
1959	92,754	25,314	45,842	18,846	2,752
1960	93,581	17,534	54,329	17,798	3,920
1961	125,104	18,093	73,706	28,125	5,180
1962	116,303	23,690	59,800	26,761	6,052

[a] Formal action placing the driver on notice of the imminence of suspension or revocation upon continued violation.

[b] Temporary withdrawal of the driving privilege with the surrender during the term of suspension of all licenses. At the end of the suspension the license is returned.

[c] Person's driving privilege is terminated and all licenses issued must be surrendered. The revocation is for an indefinite period and must be ended by the Department, at which time the applicant must apply for and be issued a new license before driving.

[d] License certificate is withdrawn without prejudice and must be surrendered. Any person whose license has been cancelled may immediately apply for a license.

NOTE: See Tables M-10 and M-11 for additional details.

SECTION V.

CONSTRUCTION

This section presents annual statistics on the value of building permits issued for various types of construction in California and new dwelling units as compiled by the Bureau of the Census, United States Department of Commerce, and formerly by the United States Department of Labor, Bureau of Labor Statistics.

National statistics for the period through 1959, ''Old Series'', covered approximately 6,600 permit issuing places in the United States—the total number of areas identified as permit issuing places in 1954. Data for 1959 and 1960 shown as the ''New Series'', are based on 3,014 reporting places selected out of the 10,000 known permit-issuing places in the United States in 1959. The selected places accounted for at least 90 percent of all housing units authorized by building permits in each state. Data for California are based upon 245 of approximately 400 permit offices in this State. The ''New Series'' is limited to private authorized construction except for public housing contract awards. Other public authorized construction data are not available.

Current monthly data on new residential construction authorized in permit issuing places for the United States, California and various local areas are given in *Construction Reports, Building Permits,* Bureau of the Census, United States Department of Commerce.

Private new non-residential construction for California has been prepared from special tabulations furnished by the Construction Statistics Division, Bureau of the Census, United States Department of Commerce.

TABLE V-1

CALIFORNIA BUILDING PERMIT ACTIVITY: VALUATION BY TYPE OF BUILDING CONSTRUCTION, OLD SERIES (INCLUDING PUBLIC) 1958-59,[a] (PRIVATE) 1959, NEW SERIES (PRIVATE ONLY) 1959-62

(In millions)

Type of building construction	Old series[b] (including public)		Old series[b] (private)	New series[c] (private)			
	1958	1959	1959	1959	1960	1961	1962

[a] For earlier years see *California Statistical Abstract 1961 and 1958,* Table V-1.

[b] Old series—relates to the places in California included in the approximately 6,600 permit-issuing places in the United States identified early in 1954 as having building permit systems.

U. S. Department of Commerce
Bureau of the Census
Construction Statistics Division

[c] Beginning with January 1960, the data collected and published monthly are based on information received from 3,014 places of the entire 10,000 known permit-issuing places in the United States. This selected group of areas consists generally of places where permits were issued during 1959 for at least 50 new residential housing units. The 3,014 places reporting monthly include 245 out of the approximately 400 known permit-issuing places in California.

TABLE V-2

BUILDING PERMIT ACTIVITY, VALUATION OF PRIVATE CONSTRUCTION AUTHORIZED IN SELECTED PERMIT-ISSUING PLACES, CALIFORNIA, LOS ANGELES-LONG BEACH, SAN FRANCISCO-OAKLAND, AND SAN DIEGO METROPOLITAN AREAS,[a] 1962

(In millions)

Type of building construction	California[b]	Los Angeles-Long Beach	San Francisco-Oakland	San Diego
All authorized private construction	$4,307.6	$2,126.5	$687.7	$201.6
New housing units[c]	2,766.1	1,336.8	444.4	110.5
New nonhousekeeping units	57.9	21.7	6.7	5.0
New nonresidential building	1,086.2	556.5	159.5	68.1
Industrial buildings	201.8	94.1	38.6	7.5
Office buildings	246.7	137.2	35.4	17.9
Service stations, etc.	20.7	7.8	3.1	1.5
Stores, etc.	214.0	103.1	31.5	13.3
Religious buildings	54.3	18.8	14.1	4.7
Educational buildings	36.5	18.7	2.1	1.4
Hospitals, etc.	67.8	22.4	13.8	7.1
Amusement buildings	37.6	27.7	2.6	2.2
Residential garages	16.8	7.8	1.7	1.6
All other nonresidential buildings, structures[d]	190.0	119.0	16.8	10.9
Additions and alterations	397.4	211.5	77.1	18.0

[a] Counties included in each metropolitan area:
Los Angeles-Long Beach—Los Angeles and Orange.
San Francisco-Oakland—Alameda, Contra Costa, Marin, San Francisco, San Mateo, and Solano.
San Diego—San Diego.

[b] Covers 245 selected permit-issuing places in California which are included in the national list of 3,014 places selected in 1959.

[c] Housekeeping only.

[d] Includes parking garages, public works and utilities buildings, other nonresidential building and structures, other than building.

SECTION W.

MANUFACTURING

This section presents data on manufacturing industries summarized from the U. S. Census of Manufactures and the annual surveys conducted by the United States Department of Commerce, Bureau of the Census. Detailed information for individual industries and local areas is available in the published reports of the Bureau of the Census.

Except for 1954 and 1958, the statistics beginning with 1949 are based on sample surveys. In 1954, 1958 and for the designated years prior to 1949 complete censuses were taken.

Definitions

All employees—Includes all full-time and part-time employees on the payroll of the operating establishment. For 1959, all employees represents the average number of production workers employed for the payroll period ended nearest the 15th of March, May, August, and November plus all other employees for the payroll period ended nearest the 15th of March. For 1949-1958, it represents an average of employment totals for the payroll period ended nearest the 15th of March, May, August, and November. Prior to 1949, average employment was based on 12 monthly figures. Prior to 1947, the figures exclude data for central administrative offices and auxiliary establishments which are included in the statistics for later years.

Production workers—Includes workers engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plants' own use (e.g., power plant), record keeping, and other services closely associated with these production operations at the establishment covered by the report. Supervisory employees above the working foreman level are excluded from this category.

Value added by manufacture — The unadjusted value added is derived by subtracting the cost of raw materials, semimanufactured parts and components, supplies, fuels, purchased electric energy, and contract work from the value of shipments of manufacturing establishments in each industry. Adjusted value added figures is given from 1956, and consists of the unadjusted value added by manufacture plus the net change in finished goods and work-in-process inventory between the beginning and end of the year plus the value added in merchandising activities of manufacturing establishments.

New capital expenditures—Includes, for plants in operation, expenditures made during the year for permanent additions and major alterations to plants, as well as for tools, machinery and equipment purchases.

[a] See definitions in narrative beginning this section.

[b] Includes data for privately owned and/or operated establishments classified in Major Group 19, "Ordnance and accessories." Government owned and operated establishments are excluded.

SECTION X.

COMMUNICATIONS AND UTILITIES

With the exception of Table X-1, this section presents statistics summarizing the operations of privately owned public utilities and transportation companies in California. More detailed data are available from the Public Utilities Commission.

TABLE X-1

PRODUCTION OF ELECTRICAL ENERGY IN CALIFORNIA,[a] 1940-61

(In millions of kilowatt-hours)

Year	Total				Privately owned				Publicly owned[b]			
	Total	Steam	Hydro	Internal combustion	Total	Steam	Hydro	Internal combustion	Total	Steam	Hydro	Internal combustion

TABLE X-2

USE OF ELECTRICAL ENERGY BY SPECIFIED CLASSES OF CONSUMERS, STATE OF CALIFORNIA, 1949-61

(Millions of kilowatt-hours)

Year	Total	Class of consumer				
		Residential	Commercial	Industrial	Irrigation[a]	Other[b]
1949	22,210	4,750	3,875	8,745	3,058	1,782
1950	23,871	5,160	4,096	9,556	3,273	1,786
1951	27,267	5,781	4,390	11,304	3,814	1,978
1952	29,281	6,674	4,762	12,210	3,477	2,158
1953	32,405	7,274	5,144	13,193	4,434	2,360
1954	34,314	7,975	5,444	13,700	4,477	2,718
1955	38,008	8,890	5,920	15,488	4,726	2,984
1956	41,217	9,877	6,218	17,391	4,303	3,428
1957	45,092	10,901	6,788	18,992	4,653	3,758
1958	46,738	11,812	7,085	19,985	3,901	3,955
1959	52,829	12,682	7,689	22,514	5,537	4,407
1960	58,113	14,390	8,370	24,689	5,615	5,049
1961	63,090	15,663	35,897[c]		5,932	5,598

[a] Includes energy used for pumping by the U. S. Bureau of Reclamation for the Central Valley Project.

[b] Includes energy used by Metropolitan Water District of Southern California for pumping Colorado River water through its main aqueduct.

[c] Data on commercial and industrial use not available separately.

Department of Water Resources
Division of Resources Planning

Note: Total quantities shown differ from those in Table X-1 for two reasons: some energy used in California is generated outside the State (and vice versa); more important, transmission and distribution losses are not included in this table.

Source: Department of Water Resources, records.
